Kalschne, Marinês P. Corso ,Cristiane Canan, 2020-08-31 Meat and meat based products play an important role as foods in the diets of people around the world However environmental and social issues have posed a challenge to meat production processing plants with the advent of more consumer conscious production values across the food processing industry and a changing attitude among some communities towards the consumption of products from animal origin The development of meat science and technology has brought solutions that allow the consumption of meat in a greater proportion from the source Traditional processes such as salting smoking and fermentation have been refined and more recently processes such as emulsification marinating and tenderizing of meat have further diversified meat products Meat processing technology is also required to meet consumer expectations and demands for nutritious and safe food Consumer requirements have pushed for need for adaptation and

modernization of slaughterhouses as well as the use of more suitable processing technologies for saving water energy and reducing waste production all while trying to provide a high level of nutritional sensory and food safety for consumers

Advances in Meat Processing Technologies aims to inform students researchers lecturers and others who are interested in the subject about new meat and meat based product processing technologies The handbook covers a variety of meat processing technologies including dry fermentation meat emulsification curing marinating restructuring and processing of non emulsified meat and meat analogues Additional chapters cover the use of additives and ultrasound technology in meat processing as well as different strategies suitable for meat processing operations The simple topical presentation of the book which covers a wide variety of products makes the book a key reference for informing students researchers lecturers professionals and general readers who are interested in the subject of meat processing technology

Meat was originally processed to preserve it but since the various procedures cause so many changes in texture and flavour it is also a means of adding variety to the diet Processing also provides scope to mix the less desirable parts of the carcass with lean meat and in addition is a means of extending meat supplies by including other foodstuffs such as cereal in the product Food preservation is a method of maintaining foods at a desired level of properties or nature for their maximum benefits Preservation usually involves preventing the growth of bacteria yeasts fungi and other micro organisms although some methods work by introducing bacteria or fungi to the food as well as retarding the oxidation of fats which cause rancidity Today meat is processed with salt colour fixing ingredients and seasonings in order to impart desired palatability traits to intact and comminuted meat products Products intermediate to these categories are sectioned or chunked and formed meats There are various methods for the preservation of meat curing dry curing smoking canning freezing dehydration fat extraction wet or steam rendering etc Meat curing agents include sodium chloride nitrite ascorbate or erythorbate and possibly sodium phosphate sucrose dextrose or corn syrup and seasonings The salt content of processed meats varies 1 to 12% according to the type of product Many intact and comminuted cured meat products are smoked to impart a desirable smoked flavour and colour The smoking process many also include a drying or cooking cycle depending on the product Canned meats may be processed to be commercially sterile or semi preserved The objective of commercial sterilization is to destroy all harmful bacteria or bacteria that may cause spoilage of the product under normal unrefrigerated storage However the process does not kill the spores of all heat resistant bacteria Frozen meat can be kept at low temperatures for many months Freezing and subsequent thawing produce changes in the structure of meat that affect its physical properties If meat is frozen very rapidly at low temperatures the ice crystals are small and form within the fibers The drip loss upon thawing is generally greater in slow frozen than in quick frozen meat Freeze drying meat extends shelf life and reduces weight The meat is readily defrosted by immersing in water

before cooking Under optimum processing and storage conditions reconstituted meats have acceptable flavour colour texture and nutrient retention The meat packing industry handles the slaughtering processing packaging and distribution of animals such as cattle pigs sheep and other livestock The basic purpose of packaging is to protect meat and meat products from undesirable impacts on quality including microbiological and physio chemical alterations Packaging protects foodstuffs during processing storage and distribution from contamination by dirt by contact with surfaces and hands microorganisms bacteria moulds and yeasts parasites mainly insects toxic substances chemicals influences affecting colour smell and taste off odour light oxygen loss or uptake of moisture As such due to the recent up gradation of preservation techniques the preservation industry is also growing almost at the same rate as the food industry which is about 10 to 12% per year Some of the fundamentals of the book are meat product simultaneous flavouring and tenderizing synthetic flavouring preservation moisture retention and surface protection antimicrobial treatment antioxidant application to freeze dried meats packaging and handling for storage and transportation continuous steam cooking of ground meat activators of natural proteolytic enzymes isotonic enzyme solution with specific activity inactivation of enzymes with high pressure etc The origin of meat processing is lost in antiquity but probably began when primitive humans first learned that salt is an effective preservative and that cooking prolongs the keeping quality of fresh meat This book includes the processing of fresh meats the different curing agents method of curing smoking and manufacturing of various meat products such as sausages canned meat cured and smoked meats etc The book is very useful for entrepreneurs technocrats and those who want to venture in to this field
