It focusses on the essential skills needed to formulate business policies that help gain a competitive edge in today's work environment. The book discusses the basic concepts, terminology and methods that eventually allow students to interpret, analyse and evaluate actual corporate financial statements. It covers the major areas of managerial economics and financial accounting such as the theory of the firm, the demand theory and forecasting, the production and cost theory and estimation, the market structure and pricing, investment analysis, accountancy and different forms of business organisations. The book includes numerous examples, problems, self-assessment tests as well as review questions at the end of each chapter to aid in working out solutions to business problems. The book will be particularly suitable for courses in Managerial Economics and Financial Accounting as part of an engineering degree education at undergraduate level where the students have no previous background in economic and financial analysis. It will also be immensely useful for M B A M Com and C A students, business executives and administrators who need to learn the application of economic theory to realistic business situations. **Managerial Economics** Dr. Ajay Nanaji Saratkar, The key of Managerial Economics is the micro economic theory of the firm. It lessens the gap between economics in theory and economics in practice. Managerial Economics is a science dealing with effective use of scarce resources. It guides the managers in taking decisions relating to the firm's customers, competitors, suppliers as well as relating to the internal functioning of a firm. It makes use of statistical and analytical tools to assess economic theories in solving practical business problems. Study of Managerial Economics helps in enhancement of analytical skills, assists in rational configuration as well as solution of problems. While microeconomics is the study of decisions made regarding the allocation of resources and prices of goods and services, macroeconomics is the field of economics that studies the behavior of the economy as a whole, i.e. entire industries and economies.
