

An anatomical illustration of a human torso, focusing on the right side. The image shows a cross-section of the body, revealing the underlying structures. Large, pinkish-red muscles are prominent, with some showing a striated texture. A network of blue and red blood vessels (arteries and veins) is visible, branching out across the scene. Interspersed among the vessels and muscles are green, branching structures representing the nervous system, including nerves and ganglia. The overall composition is dynamic, with various elements overlapping and creating a sense of depth. The background is a light, neutral color, making the anatomical structures stand out.
