DRAGNET NATION

An aerial photograph of a city street, likely New York City, showing a grid of sidewalks and streets. Numerous people are walking on the sidewalks, many of whom are holding bright green umbrellas. The umbrellas are scattered across the frame, some near the title and others further down. The overall scene suggests a rainy day in a busy urban environment.

Dragnet Nation :

Dragnet Nation Julia Angwin, 2014-02-25 An investigative journalist offers a revealing look at how the government private companies and criminals use technology to indiscriminately sweep up vast amounts of our personal data and discusses results from a number of experiments she conducted to try and protect herself

Life by Algorithms Catherine Besteman, Hugh Gusterson, 2019-05-23 Essays on the downsides dysfunctions and dangers of automated decision making An excellent survey of the algorithmically managed life Choice The phone systems that businesses use to screen calls The link between student standardized test scores and public schools access to resources The algorithms that regulate patient diagnoses and reimbursements to doctors The impenetrable corporate bureaucracy that can drive customers in need of help up the wall or drive them to suicide The storage sorting and analysis of massive amounts of information have enabled the automation of decision making at an unprecedented level Meanwhile computers have offered a model of cognition that increasingly shapes our approach to the world The proliferation of roboprocesses is the result as editors Catherine Besteman and Hugh Gusterson observe in this rich and wide ranging volume which features contributions from a distinguished cast of scholars in anthropology communications international studies and political science Though automatic processes are designed to be engines of rational systems the stories in Life by Algorithms reveal how they can in fact produce absurd inflexible or even dangerous outcomes Joining the call for algorithmic transparency the contributors bring exceptional sensitivity to everyday sociality into their critique to better understand how the perils of modern technology affect finance medicine education housing the workplace food production public space and emotions not as separate problems but as linked manifestations of a deeper defect in the fundamental ordering of our society The Machine Stops E M Forster s 1909 science fiction story tells the tale of a human society collapsing when the technology upon which it has become dependent fails Think of this volume as The Machine Starts a collection of unsettling ethnographic accounts of the rise of algorithmic governance A necessary and sobering call to arms Stefan Helmreich Massachusetts Institute of Technology Contributors include Catherine Besteman Alex Blanchette Robert W Gehl Hugh Gusterson Catherine Lutz Ann Lutz Fernandez Joseph Masco Sally Engle Merry Keesha M Middlemass Noelle Stout Susan J Terrio

Secret Intelligence Christopher Andrew, Richard J. Aldrich, Wesley K. Wark, 2019-07-26 The second edition of Secret Intelligence A Reader brings together key essays from the field of intelligence studies blending classic works on concepts and approaches with more recent essays dealing with current issues and ongoing debates about the future of intelligence Secret intelligence has never enjoyed a higher profile The events of 9 11 the conflicts in Iraq and Afghanistan the missing WMD controversy public debates over prisoner interrogation together with the revelations of figures such as Edward Snowden recent cyber attacks and the rise of hybrid warfare have all contributed to make this a hot subject over the past two decades Aiming to be more comprehensive than existing books and to achieve truly international coverage of the field this book provides key readings and supporting material for students and

course convenors It is divided into four main sections each of which includes full summaries of each article further reading suggestions and student questions The intelligence cycle Intelligence counter terrorism and security Ethics accountability and secrecy Intelligence and the new warfare This new edition contains essays by leading scholars in the field and will be essential reading for students of intelligence studies strategic studies international security and political science in general and of interest to anyone wishing to understand the current relationship between intelligence and policy making

Sustainable Abundance for All Ted Nunez, 2018-01-15 What constitutes the good life and authentic Christian leadership in a high speed technological society geared to perpetual economic growth In a world of rapid change and heightened risks how do we move beyond the tyranny of emergency and polarization toward a politics of engagement and time oriented to the long term common good Taking up key themes in the social teaching of Popes Benedict XVI and Francis *Sustainable Abundance for All* argues that life in a risky runaway world requires new forms of Christian praxis that are both forward looking and rooted in tradition Among the issues addressed are pathways toward sustainable development in the Anthropocene automation and the transition to post jobs society the proactionary precautionary debate over new technologies and the dangers of becoming people of the device *Sustainable Abundance for All* lays the groundwork for new kinds of Christian social action and prophetic witness in the twenty first century

Smarter Than You Think Clive Thompson, 2014-08-26 A revelatory and timely look at how technology boosts our cognitive abilities making us smarter more productive and more creative than ever It s undeniable technology is changing the way we think But is it for the better Amid a chorus of doomsayers Clive Thompson delivers a resounding yes In *Smarter Than You Think* Thompson shows that every technological innovation from the written word to the printing press to the telegraph has provoked the very same anxieties that plague us today We panic that life will never be the same that our attentions are eroding that culture is being trivialized But as in the past we adapt learning to use the new and retaining what is good of the old *Smarter Than You Think* embraces and extols this transformation presenting an exciting vision of the present and the future

Digital Detachment Chet A Bowers, 2016-01-29 The digital revolution is changing the world in ecologically unsustainable ways 1 it increases the economic and political power of the elites controlling and interpreting the data 2 it is based on the deep assumptions of market liberalism that do not recognize environmental limits 3 it undermines face to face and context specific forms of knowledge 4 it undermines awareness of the metaphorical nature of language 5 its promoters are driven by the myth of progress and thus ignore important cultural traditions of the cultural commons that are being lost and 6 it both bypasses the democratic process and colonizes other cultures This book provides an in depth examination of these phenomena and connects them to questions of educational reform in the US and beyond

Technology and Public Management Alan R. Shark, 2022-12-30 Students of public administration public policy and nonprofit management require a strong foundation in how government and NGOs are connected with information technology Whether simplifying internal operations delivering

public facing services governing public utilities or conducting elections public administrators must understand these technological tools and systems to ensure they remain effective efficient and equitable This innovative textbook is designed for students of public affairs at every level who need to know and understand how technology can be applied in today s public management workplace The book explores the latest trends in technology providing real life examples about the need for policies and procedures to safeguard technology infrastructure while providing greater openness participation and transparency In Technology and Public Management Second Edition author Alan Shark informs engages and directs students to consider best practices with new material on emerging technology data management and analytics artificial intelligence and cybersecurity This thoroughly updated second edition explores A broad range of technologies on which government nonprofit partners and citizens depend upon to deliver important infrastructure including security education public health and personal healthcare transit and transportation culture and commerce Growing mistrust in government and the role technology can play in ameliorating it Emerging and adapted technologies to help government achieve ambitious goals including drawing carbon out of the atmosphere empowering students everywhere to learn effectively at home or at school improving healthcare providing affordable housing enabling agriculture to keep pace with population growth and improving scores of other public services The critical insights and management skills needed to argue for investments in information technology as necessary priorities for our public organizations to improve public services and resources This reader friendly and jargon free textbook is required for students enrolled in public administration and nonprofit management programs as well as for practicing public administrators looking for a better understanding of how technology may be successfully and responsibly used in public organizations It is equally valuable as a text for MBA studies social work education public health and other degree programs that produce graduates who will work with and within those organizations that deliver public services

The Ubiquitous Internet Anja Bechmann, Stine Lomborg, 2014-11-13 This book presents state of the art theoretical and empirical research on the ubiquitous internet its everyday users and its economic stakeholders The book offers a 360 degree media analysis of the contemporary terrain of the internet by examining both user and industry perspectives and their relation to one another Contributors consider user practices in terms of internet at your fingertips the abundance free flow and interconnectivity of data They then consider industry s use of user data and standards in commodification and value creation

Black Ops Advertising Mara Einstein, 2016-09-01 From Facebook to Talking Points Memo to the New York Times often what looks like fact based journalism is not It s advertising Not only are ads indistinguishable from reporting the Internet we rely on for news opinions and even impartial sales content is now the ultimate corporate tool Reader beware content without a corporate sponsor lurking behind it is rare indeed *Black Ops Advertising* dissects this rapid rise of sponsored content a strategy whereby advertisers have become publishers and publishers create advertising all under the guise of unbiased information Covert selling mostly in the form of native

advertising and content marketing has so blurred the lines between editorial content and marketing message that it is next to impossible to tell real news from paid endorsements In the 21st century instead of telling us to buy buy BUY marketers engage with us so that we share share SHARE the ultimate subtle sell Why should this concern us Because personal data personal relationships and our very identities are being repackaged in pursuit of corporate profits Because tracking and manipulation of data make likes and tweets and followers the currency of importance rather than scientific achievement or artistic talent or information the electorate needs to fully function in a democracy And because we are being manipulated to spend time with technology to interact with friends to always be on even when it is to our physical and mental detriment

Privacy is Power Carissa Veliz,2021-04-06 An Economist Book of the Year Every minute of every day our data is harvested and exploited It is time to pull the plug on the surveillance economy Governments and hundreds of corporations are spying on you and everyone you know They re not just selling your data They re selling the power to influence you and decide for you Even when you ve explicitly asked them not to Reclaiming privacy is the only way we can regain control of our lives and our societies These governments and corporations have too much power and their power stems from us from our data Privacy is as collective as it is personal and it s time to take back control Privacy Is Power tells you how to do exactly that It calls for the end of the data economy and proposes concrete measures to bring that end about offering practical solutions both for policymakers and ordinary citizens

Domestic Surveillance Tamara Thompson,2014-12-12 Readers explore the worth of domestic surveillance and how it impacts the country This volume also looks at the ethics of the National Security Agency as well as whether or not domestic surveillance needs more oversight Fifteen different essays provide debate on both sides of every issues allowing readers to sharpen their critical thinking skills

Domestic Surveillance

Noël Merino,2015-12-07 The Patriot Act dramatically expanded the government s ability to gather surveillance on American citizens This anthology contains a diverse collection of essays that present opposing viewpoints on domestic surveillance Disparate viewpoints are encapsulated with the use of a question and response format Students are encouraged to weigh the merits of divergent opinions so that they may understand the topic inclusively Constitutional implications and national security are among the topics discussed

The Machine Never Blinks Ivan Greenberg, Everett Patterson, Joseph Canlas,2020-05-06 This graphic history traces spying and surveillance from legends to the present In The Machine Never Blinks the story of surveillance is presented from its earliest days to help you more fully understand today s headlines about every increasing constant and unrelenting monitoring and global data collection It s a threat to your rights privacy dignity and sanity This book spans surveillance from the Trojan Horse through 9 11 and to the so called War on Terror which enabled the exponential growth of government and corporate intercepts and databases It also explains spying as entertainment reality TV and convenience smart speakers Take a look around Who s watching you right now

Monopolies Suck Sally Hubbard,2020-10-27 An urgent and witty manifesto Monopolies Suck lucidly explains how monopolies threaten

democracy worsen inequality and imperil the American Dream and why it's more important than ever to take action David Cicilline Something's not right No matter how hard you work life seems to only get harder When your expenses keep going up but your income stays flat when you're price gouged buying medicine for your child's life threatening allergy when you live in a hyped up state of fear and anxiety monopoly power is playing a key role In Monopolies Suck antitrust expert and director at the Open Markets Institute Sally Hubbard shows us the seven ways big corporations rule our lives and what must be done to stop them Throughout history monopolists who controlled entire industries like railroads and oil were aptly called robber barons because they extracted wealth from everyone else and today's monopolies are no different By charging high prices skirting taxes and reducing our pay and economic opportunities they are not only stealing our money but also robbing us of innovation and choice as market dominance prevents new companies from challenging them They're robbing us of the ability to take care of our sick a healthy food supply and a habitable planet by using business practices that deplete rather than generate They're a threat to our private lives fair elections a robust press and ultimately the American Dream that so many of us are striving for In this accessible guide Zephyr Teachout author of Break Em Up Sally Hubbard gives us an easy to understand overview of the history of monopolies and antitrust law and urges us to use our voices votes and wallets to protest monopoly power Emboldened by the previous century when we successfully broke up monopoly power in the US we have the tools to dismantle corporate power again today before their lobbying threatens to undermine our economy and democracy for generations to come

Why Privacy Matters Neil Richards, 2021-11-05 This is a book about what privacy is and why it matters Governments and companies keep telling us that Privacy is Dead but they are wrong Privacy is about more than just whether our information is collected It's about human and social power in our digital society And in that society that's pretty much everything we do from GPS mapping to texting to voting to treating disease We need to realize that privacy is up for grabs and we need to craft rules to protect our hard won but fragile human values like identity freedom consumer protection and trust Author Neil Richards shows what privacy is why privacy matters and how we can build a better digital future together

Metrics at Work Angèle Christin, 2020-06-30 The starkly different ways that American and French online news companies respond to audience analytics and what this means for the future of news When the news moved online journalists suddenly learned what their audiences actually liked through algorithmic technologies that scrutinize web traffic and activity Has this advent of audience metrics changed journalists' work practices and professional identities In Metrics at Work Angèle Christin documents the ways that journalists grapple with audience data in the form of clicks and analyzes how new forms of clickbait journalism travel across national borders Drawing on four years of fieldwork in web newsrooms in the United States and France including more than one hundred interviews with journalists Christin reveals many similarities among the media groups examined their editorial goals technological tools and even office furniture Yet she uncovers crucial and paradoxical differences in how American and French journalists understand audience analytics

and how these affect the news produced in each country American journalists routinely disregard traffic numbers and primarily rely on the opinion of their peers to define journalistic quality Meanwhile French journalists fixate on internet traffic and view these numbers as a sign of their resonance in the public sphere Christin offers cultural and historical explanations for these disparities arguing that distinct journalistic traditions structure how journalists make sense of digital measurements in the two countries Contrary to the popular belief that analytics and algorithms are globally homogenizing forces Metrics at Work shows that computational technologies can have surprisingly divergent ramifications for work and organizations worldwide

Surveillance Capitalism in America Josh Lauer, Kenneth Lipartito, 2021-10-15 Surveillance Capitalism in America offers a crucial historical perspective on the intimate relationship between surveillance and capitalism While surveillance is often associated with governments today the role of the private sector in the spread of everyday surveillance is the subject of growing public debate Tech giants like Google and Facebook are fueled by a continuous supply of user data and digital exhaust Surveillance is not just a side effect of digital capitalism it is the business model itself suggesting the emergence of a new and more rapacious mode of capitalism surveillance capitalism But how much has capitalism really changed Surveillance Capitalism in America explores the historical development of commercial surveillance long before computers and suggests that surveillance has been central to American capitalism since the nation's founding Managers surveilled labor merchants surveilled consumers and businesses surveilled each other Focusing on events in the United States the chapters in this volume examine the deep logic of modern surveillance as a mode of rationalization bureaucratization and social control from the early nineteenth century forward Even more business surveillance has often involved collaborations with the state through favorable laws policing and information sharing The history of surveillance capitalism is thus the history of technological legal and knowledge infrastructures built over decades Together the chapters in this volume reveal the long arc of surveillance capitalism from the violent coercion of slave labor to the seductions of target marketing

The Black Box Society Frank Pasquale, 2015-01-05 Every day corporations are connecting the dots about our personal behavior silently scrutinizing clues left behind by our work habits and Internet use But who connects the dots about what firms are doing with all this information Frank Pasquale exposes how powerful interests abuse secrecy for profit and explains ways to rein them in

Liberty from All Masters Barry C. Lynn, 2020-09-29 An eye opening and persuasive defense of robust antitrust enforcement as essential to the core principles of American democracy Publishers Weekly Very few thinkers in recent years have done more to shift the debate in Washington than Barry Lynn In Liberty from All Masters he proves himself as a lyrical theorist and a bold interpreter of history This book is an elegant summoning of a forgotten tradition that can help the nation usher in a new freedom Franklin Foer Americans are obsessed with liberty mad about liberty On any day we can tune into arguments about how much liberty we need to buy a gun or get an abortion to marry who we want or adopt the gender we feel We argue endlessly about liberty from regulation and observation by the

state and proudly rebel against the tyranny of course syllabi and Pandora playlists Redesign the penny today and the motto would read You ain't the boss of me Yet Americans are only now awakening to what is perhaps the gravest domestic threat to our liberties in a century in the form of an extreme and fast growing concentration of economic power Monopolists today control almost every corner of the American economy The result is not only lower wages and higher prices hence a concentration of wealth and power in the hands of the few The result is also a stripping away of our liberty to work how and where we want to launch and grow the businesses we want to create the communities and families and lives we want The rise of online monopolists such as Google and Amazon designed to gather our most intimate secrets and use them to manipulate our personal and group actions is making the problem only far worse fast Not only have these giant corporations captured the ability to manage how we share news and ideas with one another they increasingly enjoy the power to shape how we move and play and speak and think An examination of our fall into the economic pit crafted by Amazon Google et al and ideas for how to crawl out Admonitory cautionary and essential Kirkus Reviews starred review *Cyberlibertarianism* David Golumbia, 2024-11-12 An urgent reckoning with digital technology's fundamentally right wing legal and economic underpinnings In a timely challenge to the potent political role of digital technology Cyberlibertarianism argues that right wing ideology was built into both the technical and social construction of the digital world from the start Leveraging more than a decade of research David Golumbia traces how digital evangelism has driven the worldwide shift toward the political right concealing inequality xenophobia dishonesty and massive corporate concentrations of wealth and power beneath the utopian presumption of digital technology as an inherent social good Providing an incisive critique of the push for open access and open source software and the legal battles over online censorship and net neutrality Cyberlibertarianism details how the purportedly democratic internet has been employed as an organizing tool for terror and hate groups and political disinformation campaigns As he unpacks our naively utopian conception of the digital world Golumbia highlights technology's role in the advancement of hyperindividualist and antigovernment agendas demonstrating how Silicon Valley corporations and right wing economists antiestablishment figures such as Julian Assange Elon Musk Peter Thiel Edward Snowden and Mark Zuckerberg and seemingly positive voices such as John Perry Barlow Cory Doctorow the Electronic Freedom Foundation and Wikipedia all have worked to hamper regulation and weaken legal safeguards against exploitation Drawing from a wide range of thought in digital theory economics law and political philosophy as well as detailed research and Golumbia's own experience as a software developer Cyberlibertarianism serves as a clarion call to reevaluate the fraught politics of the internet In the hope of providing a way of working toward a more genuinely democratic and egalitarian future for digital technology this magisterial work insists that we must first understand the veiled dogmas from which it has been constructed Retail e book files for this title are screen reader friendly
