Drawing Geological Cross Sections:

Foundations of Engineering Geology, Third Edition Tony Waltham, 2009-04-22 Now in full colour the third edition of this well established book provides a readable and highly illustrated overview of the aspects of geology that are most significant to civil engineers Sections in the book include those devoted to the main rock types weathering ground investigation rock mass strength failures of old mines subsidence on peats and clays sinkholes on limestone and chalk water in landslides slope stabilization and understanding ground conditions The roles of both natural and man induced processes are assessed and this understanding is developed into an appreciation of the geological environments potentially hazardous to civil engineering and construction projects For each style of difficult ground available techniques of site investigation and remediation are reviewed and evaluated Each topic is presented as a double page spread with a careful mix of text and diagrams with tabulated reference material on parameters such as bearing strength of soils and rocks This new edition has been comprehensively updated and covers the entire spectrum of topics of interest for both students and practitioners in the field of civil engineering

Field Methods for Geologists and Hydrogeologists Fakhry A. Assaad, Philip E. LaMoreaux, 2004-02-12 From the reviews is a must for serious field novices and for seasoned middle career and senior practitioners in hydrogeology mainly those people who answer a calling to offer honest and accurate hydrogeological approximations and findings Any engineering geologist or groundwater geologist who claims capability as a Hydrogeologist should own this book and submit it to highlighting and page tabbing Of course the same goes for those who practice in karst terranes as author LaMoreaux is one of the pioneers in this field worldwide Allen W Hatheway

Geologic Cross Sections C.S. Langstaff, D. Morrill, 1981-01-31 This book accompanies a videotape program of the same name The combined videotape and book referred to as a module of instruction was one of three prepared by IHRDC on a joint basis with Mobil Oil Corporation during 1980 The three modules one each in geology geophysics and petroleum engineering were produced to determine whether this medium of instruction would provide an effective way of teaching recent graduates and those individuals changing specialties what they need to know when they need to know it The major observations Of the pilot production stage were that properly designed and properly used video assisted instruction is effective efficient and convenient With the confidence that this instructional medium provides one way for the international petroleum industry to train young graduates in exploration
