Group Leader: _____
(organizes group and keeps group on task while contributing)
Group Recorder: _____
(writes down answers while contributing)
Group Researcher: _____
(looks up answers while contributing)
Group Researcher: _____
(looks up answers while contributing)

Directions:

Step 1: Each of the following words is an organism, a habitat, or a niche. Among your group, decide what each one is and label it as H for habitat, N for Niche, or O for organism. Look up any words that you do not know the meaning of in the textbook.

Student	School	Child between ages 5-18	human skin	nest
bat	migration	pollinator	soil decomposer	herbivore (eats plants only)
black bear	butterfly	under a rock	Arctic tern (bird)	carnivore (eats meat only)
insectivore (eats insects)	omnivore (eats plants & animals)	honeybee	rodentivore (eats rodents like mice)	rotten log
horse	hive	earthworm	coyote	lion
prairie	scavenger	hibernation	mushroom	den
cave	hibernation	moist soil (under-ground in the dark)	snake	cause infection
African savannah	Humans	houses	MRSA bacteria	

Step 2: For each organism above there is a habitat and niche. Fill out the following table with your group members. At the end you should have 13 sets of organisms, habitats, and niches. Use your textbook to help you.

Geodynamic Models R. W. Van Bemmelen, 2013-10-22. Developments in Geotectonics Volume 2. Geodynamic Models: An Evaluation and a Synthesis presents the concept of sea floor spreading and the hypothesis of global plate tectonics. This book provides a basic understanding of the global movements. Organized into eight chapters, this volume begins with an overview of the concept of global plate tectonics with its additional hypotheses of subduction zones and sea floor spreading. This text then examines the concept of vertical deformations of the lithosphere and their gravitational spreading. Other chapters consider the analysis of geotectonic processes that is based on some general principles of their mechanics. This book discusses as well the origin of megafaults in turbulent and laminar flow systems in the lower mantle where the matter may have a Newtonian viscosity. The final chapter deals with the geodynamics of the Earth's crust as the result of the outward growth of the deep ocean floor from mid-ocean ridges. This book is a valuable resource for geologists, geomorphologists and geophysicists.

Climate Actions Brenda Groszki, 2022-03-15. This book offers a diverse set of solid concerted strategies in the development and implementation of specific climate actions in natural and built places where we all live. The book also serves as a conduit of knowledge for those who are unsure on how they can make a difference for their families, their communities and the natural places that surround them. Through many actionable examples of mitigation efforts for the ever-present effects of climate change, especially for those who may not understand the wide range of climate action opportunities that are available. Scientists, academics and community leaders will find concrete examples on how they too can develop and implement climate action solutions.

Building an Ark Ethan Smith, 2007-11-01. Building an Ark 101: Solutions to Animal Suffering is a first of its kind inspiring look at practical solutions to the impact humans have on animals and the natural world. Factory farms, habitat destruction, animal product testing, the abuse and neglect of companion animals, the illegal trade in endangered species, unsustainable fishing and climate change all create unnecessary suffering for animals. For several decades there has been a global movement building an ever-increasing consciousness that will soon affect animal welfare and the future of life on Earth if it is given time to do so. Building an Ark is the story of this movement. Extensively researched and drawing on practical examples from around the world, it provides a voice for both the animals and the humans who have dedicated their lives to building a sustainable future for all species. The Ark is ready for all to board. Individuals, action groups, schools,

businesses governments farmers fishers developing nations there s a role for everyone on this journey Building an Ark offers a host of solutions that if adopted will ensure that animals will suffer less today and that humans and animals will share a more sustainable planet tomorrow

Bat Roosts in Rock Bat Rock Habitat Key,2021-11-23 This guide provides descriptions of when the bat species resident in Britain and Ireland use natural and human made rock habitats how they use them and the environments each species occupies therein For the first time it brings together findings from historical scientific investigations useful photographic accounts and open access biological records along with a rich seam of new data all in a practical and user friendly structure The book encompasses Descriptions of the features that a climber caver or professional ecologist might encounter on and in rock habitats where bats roost Recording criteria for both the physical and environmental attributes of different features and situations Identification of suitability thresholds against which the recorded information can be compared to assess the likelihood that a specific feature might be exploited by a particular bat species Suggestions for how to avoid mistakes and difficulties when performing a survey The intention is that using this book will help generate standardised biological records which can feed into the fully accessible online database at www.batrockhabitatkey.co.uk These data will be analysed to search for patterns that can increase the confidence in the suitability thresholds and help build roost features that deliver the environment each species really needs As well as offering many new insights this book allows the reader to participate in cutting edge research
