Second Generation Biometrics: The Ethical, Legal and Social Context Emilio Mordini, Dimitros Tzovaras, 2012-05-02. While a sharp debate is emerging about whether conventional biometric technology offers society any significant advantages over other forms of identification and whether it constitutes a threat to privacy, technology is rapidly progressing. Politicians and the public are still discussing fingerprinting and iris scan, while scientists and engineers are already testing futuristic solutions. Second generation biometrics, which include multimodal biometrics, behavioural biometrics, dynamic face recognition, EEG and ECG biometrics, remote iris recognition, and other still more astonishing applications, is a reality which promises to overturn any current ethical standard about human identification. Robots which recognise their masters, CCTV which detects intentions, voice responders which analyse emotions, these are only a few applications in progress to be developed. This book is the first ever published on ethical, social, and privacy implications of second generation biometrics. Authors include both distinguished scientists in the biometric field and prominent ethical, privacy, and social scholars. This makes this book an invaluable tool for policy makers, technologists, social scientists, privacy

authorities involved in biometric policy setting Moreover it is a precious instrument to update scholars from different disciplines who are interested in biometrics and its wider social ethical and political implications *Smart Computational Strategies: Theoretical and Practical Aspects* Ashish Kumar Luhach,Kamarul Bin Ghazali Hawari,Ioan Cosmin Mihai,Pao-Ann Hsiung,Ravi Bhushan Mishra,2019-03-22 This book covers new developments and advances in the field of Computational Strategies for next generation computing The contributing authors share diverse perspectives on and extensive discussions of issues concerning the theory applications and future prospects Addressing computing methodologies hardware information systems and networks this interdisciplinary book will appeal to all scholars with an interest in computing methodologies hardware information systems and networks Data Science and Communication João Manuel R.
