Operations Research and Health Care Margaret L. Brandeau, Francois Sainfort, William P. Pierskalla, 2006-04-04 In both rich and poor nations public resources for health care are inadequate to meet demand Policy makers and health care providers must determine how to provide the most effective health care to citizens using the limited resources that are available This chapter describes current and future challenges in the delivery of health care and outlines the role that operations research OR models can play in helping to solve those problems The chapter concludes with an overview of this book its intended audience the areas covered and a description of the subsequent chapters

KEY WORDS Health care delivery Health care planning **HEALTH CARE DELIVERY PROBLEMS AND CHALLENGES**

3 1 1 WORLDWIDE HEALTH THE PAST 50 YEARS Human health has improved significantly in the last 50 years In 1950 global life expectancy was 46 years 1 That figure rose to 61 years by 1980 and to 67 years by 1998 2 Much of these gains occurred in low and middle income countries and were due in large part to improved nutrition and sanitation medical innovations and improvements in public health infrastructure

Decision Making with the Analytic Network Process Thomas L. Saaty, Luis G. Vargas, 2006-09-10 The Analytic Network Process ANP developed by Thomas Saaty in his work on multicriteria decision making applies network structures with dependence and feedback to complex decision making This book is a selection of applications of ANP to economic social and political decisions and also to technological design The chapters comprise contributions of scholars consultants and people concerned about the outcome of certain important

decisions who applied the Analytic Network Process to determine the best outcome for each decision from among several potential outcomes The ANP is a methodological tool used to organize knowledge and thinking elicit judgments registered in both in memory and in feelings quantify the judgments and derive priorities from them and finally synthesize these diverse priorities into a single mathematically and logically justifiable overall outcome In deriving this outcome the ANP also allows for the representation of diverse opinions in the midst of discussion and debate

Logic and Integer Programming H. Paul Williams, 2009-04-09 Paul Williams a leading authority on modeling in integer programming has written a concise readable introduction to the science and art of using modeling in logic for integer programming Written for graduate and postgraduate students as well as academics and practitioners the book is divided into four chapters that all avoid the typical format of definitions theorems and proofs and instead introduce concepts and results within the text through examples References are given at the end of each chapter to the more mathematical papers and texts on the subject and exercises are included to reinforce and expand on the material in the chapter Methods of solving with both logic and IP are given and their connections are described Applications in diverse fields are discussed and Williams shows how IP models can be expressed as satisfiability problems and solved as such

Tools, Methodologies and Techniques Applied to Sustainable Supply Chains Jorge Luis García-Alcaraz, 2020-02-21 Supply chains are currently globalized and companies operate internationally owing to the fact that raw materials production processes and the consumption of the final products are carried out in different countries This implies high material and information flow which incurs high costs associated with the supply chain and logistics sometimes up to 60% of the total cost of the product Therefore companies seek to optimize their resources to reduce these costs and improve sustainability in a globalized market This book entitled Tools Methodologies and Techniques Applied to Sustainable Supply Chains contains 15 chapters that report case studies applied to industrial and service sectors The authors come from areas such as Mexico Colombia Italy Sweden Slovakia China and Australia They indicate how managers make use of tools and techniques to solve problems associated with supply chains to reduce their cost and remain competitive A great effort has been made to analyze this problem and the methodologies are clearly described here to facilitate the reproducibility of each technique and tool This was done in the hope that hoping that they may one day be applied in more companies
