Caplan,2013-08-06 An increasing number of psychologists who were trained in clinical psychology health psychology or  
another specialty are gravitating toward rehabilitation psychology but many of them have little or no experience with  
rehabilitation populations With the explosion of interest in traumatic brain injury TBI many neuropsychologists are taking  
jobs in rehabilitation settings that treat people with TBI but also care for persons with the array of other disabling conditions  
such as spinal cord injury stroke MS and amputation In Specialty Competencies in Rehabilitation Psychology Drs Cox Cox  
and Caplan provide a guide to the knowledge and skills required by competent rehabilitation psychologists with an emphasis  
on the evidence base of the specialty The volume will be valuable to those preparing for the Board Certification Examination  
in Rehabilitation Psychology and will also be valuable to newcomers to the field and to clinicians working on an outpatient  
basis with individuals with a wide variety of chronic conditions Series in Specialty Competencies in Professional Psychology  
Series Editors Arthur M Nezu and Christine Maguth Nezu As the field of psychology continues to grow and new specialty  
areas emerge and achieve recognition it has become increasingly important to define the standards of professional specialty  
practice Developed and conceived in response to this need for practical guidelines this series presents methods strategies  
and techniques for conducting day to day practice in any given psychology specialty The topical volumes address best  
practices across the functional and foundational competencies that characterize the various psychology specialties including  
clinical psychology cognitive and behavioral psychology school psychology geropsychology forensic psychology clinical  
neuropsychology couples and family psychology and more Functional competencies include common practice activities like  
assessment and intervention while foundational competencies represent core knowledge areas such as ethical and legal  
issues cultural diversity and professional identification In addition to describing these competencies each volume provides a  
definition description and development timeline of a particular specialty including its essential and characteristic pattern of  
activities as well as its distinctive and unique features Written by recognized experts in their respective fields volumes are  
comprehensive up to date and accessible These volumes offer invaluable guidance to not only practicing mental health

**A Neuropsychologist's Guide to Training Psychometrists** Christine S. Ghilain, 2021-12-24

A Neuropsychologist's Guide to Training Psychometrists Promoting Competence in Psychological Testing provides a framework for busy neuropsychologists faced with training their newly hired psychometrist. It supplies concrete guidelines and provides a roadmap for training that can be customized to any practice department or clinic setting. In this essential resource, Dr. Christine S. Ghilain discusses the role of the psychometrist in various neuropsychological practice settings and provides suggested minimum standards of competence across training domains. She dives deeply into the core components of assessment from optimizing testing conditions to standardized test administration to keen observations of behavior and includes coverage of topics such as testing with unique populations, behavioral management strategies for challenging situations, as well as promoting ongoing competence over time. A compilation of several sources of data, the book includes excerpts from Dr. Ghilain's practice-specific psychometry training manual along with advice and illustrative examples from many neuropsychologists and psychometrists who shared their experiences. This book is an indispensable guide for neuropsychologists looking to instill high standards of competence in their hired professionals and for those involved in training graduate students who are just learning to administer cognitive tests. It is also of interest to other assessment-focused professionals looking to enhance their skills and refine their psychological testing knowledge.

**Handbook of Clinical Health Psychology** Susan Llewelyn, Paul Kennedy, 2005-01-21

The Handbook of Clinical Health Psychology provides a comprehensive overview of the practice of clinical health psychology. It is primarily a well-referenced but practical resource which provides an authoritative up-to-date guide to empirically validated psychological interventions in health care. Each contributor provides a conceptual synthesis of the area and how key models are related to formulation, service delivery, and research. The book also considers contextual issues and the importance of topics such as ageism and power, which may have an impact on how health psychology is delivered by practitioners and experienced by recipients of services. It also seeks to provide a summary of evidence concerning crucial aspects in the delivery of care such as adherence, rehabilitation, and stress. The biopsychosocial model is the major theoretical model underpinning all contributions, but use is also made of other models. Informative and practical, a guide to action. An authoritative, critical, and evidence-based synthesis of knowledge that will guide best practice. Easy-to-use format intended for practitioners who want to ensure their practice is state-of-the-art.
