An Analysis of Hans J. Morgenthau's Politics Among Nations Ramon Pacheco Pardo, 2017-07-05 Hans Morgenthau's *Politics Among Nations* is a classic of political science built on the firm foundation of Morgenthau's watertight reasoning skills The central aim of reasoning is to construct a logical and persuasive argument that carefully organizes and supports its conclusions often around a central concept or scheme of argumentation Morgenthau's subject was international relations the way in which the world's nations interact and come into conflict or peace a topic which was of vital importance during the unstable wake of the Second World War To the complex problem of understanding the ways in which the post war nations were jostling for power Morgenthau brought a comprehensive schema the concept of realism or in other words the idea that every nation will act so as to maximise its own interests From this basis Morgenthau builds a systematic argument for a pragmatic approach to international relations in which nations seeking consensus should aim for a balance of power grounding relations between states in understandings of how the interests of individual nations can be maximized Though seismic shifts in international politics after the Cold War undeniably altered the landscape of international relations Morgenthau's dispassionate reasoning about the nature of our world remains influential to this day

Study On International Politics In Contemporary China Yuyan Zhang, 2020-07-14 China's guiding principle for foreign relations and its focus on states and regions has shifted a lot from the first 30 years of the founding of the People's Republic of China PRC in 1949 to 1978 and beyond after reform and opening up However PRC's diplomatic practice has been continuous whether it was participation in the Korean War breaking up with the former Soviet Union after a honeymoon period China's self defense war over Sino Indian border participation in the Vietnam War breakthrough in the Sino US relation or PRC's self defense war over the Sino Vietnamese border These historical events brought the need for theoretical study in International Politics IP The development of China's IP research was slow and filled with complications but it signified a breakthrough from scratch This book has filled gap by depicting a complete scroll of China's IP research in over 60 years since 1949 This book has followed two principles one is according to the classification of the IP discipline and the other is to recommend adaptations according to China's actual conditions

At Home Abroad Henry R. Nau, 2002 The United States has never felt at home abroad The reason for this unease even after the terrorist attacks of September 11 2001 is not frequent threats to American security It is America's identity The United States its citizens believe is a different country a New World of divided institutions and individualistic markets surviving in an Old World of nationalistic governments and statist economies In this Old World the United States finds no comfort and alternately tries to withdraw from it and reform it America cycles between ambitious internationalist efforts to impose democracy and world order and more nationalist appeals to trim multilateral commitments and demand that the European and Japanese allies do more In At Home Abroad Henry R Nau explains that America is still unique but no longer so very different All the industrial great powers in western Europe and arguably also Japan are now strong liberal democracies A powerful and peaceful new world exists beyond America's borders and anchors America's identity easing its discomfort and ending the cycle of withdrawal and reform Nau draws on constructivist and realist perspectives to show how relative national identities interact with relative national power to define U S national interests He provides fresh insights for U S grand strategy toward various countries In Europe the identity and power perspective advocates U S support for both NATO expansion to consolidate democratic identities in eastern Europe and concurrent but separate great power cooperation with Russia in the United Nations In Asia this perspective recommends a shift of U S strategy from bilateralism to concentric multilateralism starting with an emerging democratic security community among the United States Japan South

Korea Australia New Zealand India and Taiwan and progressively widening this community to include reforming ASEAN states and if it democratizes China In the developing world Nau s approach calls for balancing U S moral identity and material power commitments avoiding military intervention for purely moral reasons as in Somalia but undertaking such intervention when material threats are immediate as in Afghanistan or material and moral stakes coincide as in Kosovo

Nicholas Khoo,2011-02-21 Although the Chinese and the Vietnamese were Cold War allies in wars against the French and the Americans their alliance collapsed and they ultimately fought a war against each other in 1979 More than thirty years later the fundamental cause of the alliance s termination remains contested among historians international relations theorists and Asian studies specialists Nicholas Khoo brings fresh perspective to this debate Using Chinese language materials released since the end of the Cold War Khoo revises existing explanations for the termination of China s alliance with Vietnam arguing that Vietnamese cooperation with China s Cold War adversary the Soviet Union was the necessary and sufficient cause for the alliance s termination He finds alternative explanations to be less persuasive These emphasize nonmaterial causes such as ideology and culture or reference issues within the Sino Vietnamese relationship such as land and border disputes Vietnam s treatment of its ethnic Chinese minority and Vietnam s attempt to establish a sphere of influence over Cambodia and Laos Khoo also adds to the debate over the relevance of realist theory in interpreting China s international behavior during both the Cold War and post Cold War eras While others see China as a social state driven by nonmaterial processes Khoo makes the case for viewing China as a quintessential neorealist state From this perspective the focus of neorealist theory on security threats from materially stronger powers explains China s foreign policy not only toward the Soviet Union but also in relation to its Vietnamese allies **Realist Constructivism** J. Samuel Barkin,2010-03-25 Realism and

constructivism two key contemporary theoretical approaches to the study of international relations are commonly taught as mutually exclusive ways of understanding the subject Realist Constructivism explores the common ground between the two and demonstrates that rather than being in simple opposition they have areas of both tension and overlap There is indeed space to engage in a realist constructivism But at the same time there are important distinctions between them and there remains a need for a constructivism that is not realist and a realism that is not constructivist Samuel Barkin argues more broadly for a different way of thinking about theories of international relations that focuses on the corresponding elements within various approaches rather than on a small set of mutually exclusive paradigms Realist Constructivism provides an interesting new way for scholars and students to think about international relations theory **The Demise of the Soviet Union**

Jan Hallenberg,2018-05-08 This title was first published in 2002 Designed as a research text for academics in higher education and interested practitioners this volume weaves together an original strand of international relations theory with key empirical case studies of the United States United Kingdom France and Sweden and their attitudes towards the Soviet Union Original in nature and composition the book deals with aspects of predictability in foreign policy and gauges the level of impact that international events have on domestic levels of awareness The hypothesis and the typology are solid giving the

book its strong analytical structure In sum this book is cutting edge It will be of great use as a research text to those studying the countries of Western Europe and also those with an interest in Russia and the Soviet Union Given its strong theoretical content and its choices of case study this cross disciplinary text is also suitable for area studies in general **Playing Chess**

Withana, 2008 This book hypothesises that an ILI perspective offers a better explanation of the law State behaviour relationship during international crises than rival explanations grounded in positivism realism or functionalism Four case studies of State behaviour of the US the Soviet Union and the PRC during the Korean War 1950 1953 of the US and UK during the Suez crisis 1956 of the US and the Soviet Union during the Cuban Missile Crisis 1962 and of the US and an alliance of Latin American States during the Dominican Republic crisis 1965 are used to test the hypothesis The findings confirm the greater explanatory efficacy of ILI and demonstrate that the significance of international law to foreign policy decision making during international crises is more than that of deterring the use of force as is assumed by rival theoretical approaches grounded in a rule book image of international law Back cover
