Sustainable Consumption and Care Aurianne Stroude, Laurence Godin, Barbara Smetschka, Gabriella

Spinelli, 2025-03-31 Sustainable consumption is an essential element for the transition towards sustainable lifestyles In our daily lives care is intertwined with processes of looking after oneself family households and friends as well as distant others and the community as a whole As such it addresses all planes of human lives From a sustainability perspective care also relates to the living environment and the resources necessary for production and consumption Looking at sustainable consumption through the lens of care offers us conceptual tools to reframe how to safeguard the planet its biodiversity and the people living on it In a classic definition care is summarized as a species activity that includes everything that we do to maintain continue and repair our world so that we can live in it as well as possible Fisher and Tronto 1991 mention that world includes our bodies our selves and our environment all of which we seek to interweave in a complex life sustaining web Care highlights our vulnerability as living beings and the way a complex network of life sustaining relationships holds us responsible to each other Care is thus a significant thread that links together the ecological economic social and political systems we act within with important implications for sustainable consumption and building sustainable societies Scholarship on how care and sustainable practices interact is fragmented but the interest is growing Care originates in feminist scholarship first developed in relation to health In more recent years its uses have been also expanding to environmental and sustainability realms Today the work on sustainable consumption and care can be roughly divided into four categories The first area of work relates to whether ethical or political consumption can allow caring relations to flourish and develop The

second area of research is concerned with sustainability in the context of motherhood mostly showing how gender relations and caring activities tend to send sustainability in the background in favor of a focus on health A third and growing body of work pertains to how inconspicuous consumption is intertwined with care activities for example in relation to food or energy consumption Such work also addresses gender and social inequalities in sustainable consumption as well as notions of communities built through consumption practices and caring relations Finally care as a dimension of geographical communities or communities of interest that supports sustainability and resilience is also gaining traction The goal of this Research Topic is to delineate and differentiate the interplay between sustainable consumption and care We are interested in care in the context of sustainable consumption including social economic and ecological sustainability Resource use and material energy and time demand differ widely amongst caring practices We want to identify and explore tensions common ground innovations and key issues in these areas We consider care as a useful concept to imagine and bring about societies oriented towards sustainable wellbeing and to define the pathways and practices necessary to achieve them As we wish to define a new research area this topic aims to discuss the interrelation between care and sustainability by addressing but not limited to the following themes from a variety of perspectives amongst others feminism gender studies and intersectional approaches socio technical systems social practice theories critical theory transformative approaches time use studies socio ecological transformation or Actor Network Theory An ethos of care as a pathway towards more sustainable forms of production and consumption Conceptualizing needs and wellbeing through the lens of care Analyzing caring practices from a perspective of climate change resource use and energy demands Methodological implications of care and an intersectional feminist approach to sustainable consumption Time for care in the unpaid and paid world of work incl commodification and outsourcing of care in the global economy Teleoaffectivities emotions the body and social norms Agency social and environmental justice inequalities and sustainable wellbeing Care for the community and the public good as a way towards a more sustainable society We are particularly interested in original research methodological and theoretical papers case studies as well as policy and practice reviews *The Art of Communicating* , *Liberation Front Online.pdf* , **Hot Stocks** James Ellman,2020-07-08 The world is warming our portfolios will have to adapt and the stocks we own can help shape our future James Ellman shows how to invest wisely as climate change impacts multiple sectors across the stock market The costs of global warming and its mitigation will have a major impact on equity market performance over the next two decades As the climate changes investors will need to understand which are the best positioned market sectors and stocks as well as those to avoid Hot Stocks provides a roadmap detailing how to invest in this new reality It evaluates the many ways global warming will affect profit flows in the economy Impacts of a warmer climate rising ocean levels more frequent extreme storm events land desertification and ocean acidification Potential for government taxation on greenhouse gas emissions Accelerating switching to renewable power systems that are increasingly cost competitive with those powered

by oil fossil fuels Government bans on sales of cars powered by internal combustion engines and the electrification of the terrestrial vehicle fleet Potential for hydrocarbon reserves and equipment becoming impaired or stranded assets Rising demand for major infrastructure projects to protect valuable coastal real estate from inundation Litigation aimed at forcing legacy polluters to pay mitigation costs The book drills down on how these changes will depress or support stocks in sectors such as the petroleum industry automakers renewable power providers regional banking property insurance heavy equipment manufacturers Real Estate Investment Trusts REITs and agricultural chemicals The analysis then pivots away from a US centric focus to identify those nations around the world whose economies are best positioned to successfully adjust to the impact of rising prevailing temperatures as well as those likely to suffer the most from the trend **Commerce Business Daily** ,1998-05 **Synthetic Aesthetics** Alexandra Daisy Ginsberg,Jane Calvert,Pablo Schyfter,Alistair Elfick,Drew Endy,2014-02-28 As synthetic biology transforms living matter into a medium for making what is the role of design and its associated values Synthetic biology manipulates the stuff of life For synthetic biologists living matter is programmable material In search of carbon neutral fuels sustainable manufacturing techniques and innovative drugs these researchers aim to redesign existing organisms and even construct completely novel biological entities Some synthetic biologists see themselves as designers inventing new products and applications But if biology is viewed as a malleable engineerable designable medium what is the role of design and how will its values apply In this book synthetic biologists artists designers and social scientists investigate synthetic biology and design After chapters that introduce the science and set the terms of the discussion the book follows six boundary crossing collaborations between artists and designers and synthetic biologists from around the world helping us understand what it might mean to design nature These collaborations have resulted in biological computers that calculate form speculative packaging that builds its own contents algae that feeds on circuit boards and a sampling of human cheeses They raise intriguing questions about the scientific process the delegation of creativity our relationship to designed matter and the importance of critical engagement Should these projects be considered art design synthetic biology or something else altogether Synthetic biology is driven by its potential some of these projects are fictions beyond the current capabilities of the technology Yet even as fictions they help illuminate question and even shape the future of the field
