Reading passage

Christmas: A time for love, family, and traditions

Christmas is one of the most celebrated holidays in the world. It is a time when families gather together to celebrate the birth of Jesus Christ. In many countries, people begin preparing for Christmas weeks in advance. Homes are decorated with lights, trees, and ornaments. One of the most recognizable symbols of Christmas is the Christmas tree. Families usually place a pine tree in their homes and decorate it with lights, ornaments, and garlands.

• Traditions and family gatherings

Christmas is also a time for family gatherings. In many cultures, families exchange gifts as a way to show love and appreciation for Santa Claus, who is believed to visit homes on Christmas Eve. Santa travels around the world in a sleigh pulled by reindeer, leaving gifts for children throughout the night. Children often leave out cookies and milk for Santa on Christmas Eve. They also hang stockings by the fireplace, hoping to find small gifts inside.

Capturing Value in Digital Health Eco-Systems Felix Lena Stephanie,Ravi S. Sharma,2021-11-10 The United Nation s Sustainable Development Goals call for the establishment of Good Health and Well being and target a universal digital healthcare ecosystem by 2030 However existing technology infrastructure is ineffectual in achieving the envisioned target and requires massive reconfiguration to achieve its intended outcome This book suggests a way forward with fair and

efficient digital health networks that provide resource efficiencies and inclusive access to those who are currently underserved Specifically a fair and efficient digital health network that provides a common platform to its key stakeholders to facilitate sharing of information with a view to promote cooperation and maximise benefits A promising platform for this critical application is cloud technology with its offer of computing as a utility and resource sharing This is an area that has attracted much scholarly attention as it is well suited to foster such a network and bring together diverse players who would otherwise remain fragmented and be unable to reap the benefits that accrue from cooperation The fundamental premise is that the notion of value in a digital health ecosystem is brought about by the sharing and exchange of digital information However notwithstanding the potential of information and communication technology to transform the healthcare industry for the better there are several barriers to its adoption the most significant one being misaligned incentives for some stakeholders This book suggests among other findings that e health in its true sense can become fair and efficient if and only if a regulatory body concerned assumes responsibility as the custodian of its citizens health information so that collaboration for value will replace competition for revenue as the new axiom in delivering the public good of healthcare through digital networks
