

Change of Daylight Savings

It is a fact that takes the Earth 365 days to revolve around the sun. At the same time, the Earth rotates or spins 24 times on its axis in 24 hours, which explains why there is day and night. The half of the Earth is always facing the Sun and the other half is facing away from it. As a result, there are different time zones dividing the globe, moving suddenly from one time zone into the other, as when flying for example from Asia to North America, causes jet lag. People feel tired, they wake up suddenly during the night and cannot go back to sleep. It takes time to get used to a new time zone. Another thing to consider is the slight tilting of the Earth towards the sun. The Earth does not stand straight but leans a little to one side. Therefore, when it revolves around the Sun, the middle part of the Earth is always closer to the Sun and gets more heat. This part is called the equator, and above it lies the tropics. Countries at the tropics get the same amount of daylight all the time. The sun always rises at 6 am and sets at 6 pm. In contrast, the tips of the Earth or the Poles get hardly any light at all because they are so far away from the sun. There are two main seasons at the Poles. There are 6 months of summer, when the sun is always shining, even at night, and there are 6 months of winter, when there is constant darkness. In between the tropics and the Poles lies the temperate Zone, where there are 4 seasons, the sun rises and sets at different times throughout the year. In the spring and summer, it gets light earlier, in the fall and winter it gets dark earlier. People who live in temperate zones take advantage of that fact to get more daylight. At the beginning of spring, countries in Europe and North America read just their clocks. They change the time on their clocks and watches by moving them an hour ahead. As a result, the sun does not set around 7 or 8 am as usual but an hour later. This measure is called Daylight Savings Time (DST) and lasts from the beginning of April until the end of October. A one-hour shift from Standard or regular Time to Daylight Savings Time in France began in 1916. In the United States, the first proposal for Daylight Savings Time in the first year was put forward by William Willett. Yet his idea was shelved by the French government, who refused it because they thought it was unnecessary. Daylight Savings Time was first put into practice by the German government in 1916 in order to save energy during the First World War. Shortly after, the United Kingdom followed suit, with the United States doing the same in 1918. The law was very unpopular since people had to wake up earlier and many experienced a feeling like jet lag. But the 1970s-energy crisis forced the US to make Daylight Savings Time the law. Studies have shown that the introduction of Daylight Savings Time in the spring saved the US 10,000 barrels of oil per day between 1974-1975. It also prevented 2,000 traffic injuries and 50 traffic-related deaths, saving the country \$28 million. Currently, Americans switch to Daylight Savings Time on the first Sunday in April and move back to Standard Time on the last Sunday in October. But as of 2007, the time readjustment will happen even earlier, in March and November.

1. What is the main idea of this passage?
 (A) Time is a complicated thing to calculate.
 (B) People in different countries measure time in different ways.
 (C) Daylight Savings Time is the result of the Earth moving around the Sun.
 (D) Daylight Savings Time is not a very popular law in the USA.

HESI A2 Practice Questions: HESI A2 Practice Tests & Exam Review for the Health Education Systems, Inc. Admission Assessment Exam Hesi A Exam Secrets Test Prep, 2018-04-12 HESI A2 Practice Questions are the simplest way to prepare for the HESI A2 Practice. It is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. If someone has never taken a practice test, then they are unprepared for the types of questions and answer choices that they will encounter on the official test. There is a tremendous advantage to someone taking the test that is already familiar with the questions and answer choices. Another advantage of taking practice tests is that you can assess your performance and see if you need to study and practice more or if you're already prepared enough to achieve success on your test day. If you do well on the practice test, then you know you're prepared. If you struggle on the practice test, then you know you may still have more work to do to get prepared. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our HESI A2 Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test, and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success, and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed and more importantly, why you missed them, to be able to avoid making the same mistakes again when you take the real test. That's why our HESI A2 Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand.
