Kolathayar, Hugo Rodrigues, K. S. Sreeekeshava, 2024-03-25 This book presents select proceedings of the International Conference on Interdisciplinary Approaches in Civil Engineering for Sustainable Development IACESD 2023. The topics covered include geographic information systems (GIS) and building information modeling (BIM) integration of numerical methods for fluid flow modeling and the revolutionary potential of 3D printing within the construction industry. This book serves as a resource material for researchers and industry professionals interested in developing solutions for sustainable and resilient infrastructure that aims for communities with Net Zero Targets.

Recent Developments in Pavement Engineering Sherif Badawy, Dar-Hao Chen, 2019-11-01 This book brings together scientific experts in different areas that contribute to the design, analysis and performance of sustainable pavements. This book also contributes to transportation engineering challenges and solutions, evaluates the state of the art, identifies the shortcomings and opportunities for research and promotes the interaction with the industry. In particular, scientific topics that are addressed in this book include the use of different waste and recycled materials to improve pavement performance; pavement maintenance and rehabilitation; urban heat island due to transportation infrastructure and its mitigation techniques; machine learning applications in the prediction of pavement distresses and analysis of pavement overlay.
