Hollywood Planet Global Media And The Competitive Advantage Of Narrative Transparency Routledge Communication Series:

Hollywood Planet Scott Robert Olson, 1999-06-01 The popularity of American television programs and feature films in the international marketplace is widely recognized but scarcely understood Existing studies have not sufficiently explained the global power of the American media nor its actual effects In this volume Scott Robert Olson tackles the issue head on establishing his thesis that the United States competitive advantage in the creation and global distribution of popular taste is due to a unique mix of cultural conditions that are conducive to the creation of transparent texts narratives whose inherent polysemy encourage diverse populations to read them as though they are indigenous Olson posits that these narratives have meaning to so many different cultures because they allow viewers in those cultures to project their own values archetypes and tropes into the movie or television program in a way that texts imported from other cultures do not thus enabling the import to function as though it were an indigenous product As an innovative volume combining postcolonial and postmodern theory with global management strategic theory *Hollywood Planet* is one of the first studies that attempts to account theoretically for numerous recent ethnographic studies that suggest different interpretations of television programs and film by a variety of international audiences Relevant to studies in media theory and other areas of the communication discipline as well as anthropology sociology and related fields *Hollywood Planet* contains a powerful and original argument to explain the dominance of American media in the global entertainment market

New Television, Globalisation, and the East Asian Cultural Imagination Michael Keane, Anthony Y.H. Fung, Albert

Moran,2007-02-01 Challenging assumptions that have underpinned critiques of globalisation and combining cultural theory with media industry analysis Keane Fung and Moran give a groundbreaking account of the evolution of television in the post broadcasting era and how programming ideas are creatively redeveloped and franchised in East Asia In this first comprehensive study of television program adaptation across cultures the authors argue that adaptation transfer and recycling of content are multiplying to the point of marginalising other economic and cultural practices They also show that significant re modelling of local TV production practices occur when adaptation is genuinely responsive to local values Examples of East Asian format adaptations include Survivor Who Wants to be a Millionaire The Weakest Link Coronation Street and Idol

Communication and the Globalization of Culture

Shaheed Nick Mohammed, 2011-09-16 Shaheed Nick Mohammed's *Communication and the Globalization of Culture Beyond Tradition and Borders* provides a unique perspective on the concept of culture and its fate in the globalized mediated environment. Acknowledging widespread fears of cultural erosion at the hands of dominant global forces, Mohammed argues that what we understand as culture has always been the product of global forces including those of trade and exchange. Our very conceptions of culture are questioned. The sanctity of tradition, religion, and heritage the book suggests should give way to an appreciation of the quite mundane origins of cultural artifacts invented often as matters of political or social expedience adopted sometimes in accidents of history and canonized by time into the catechisms of cultural belief. *Communication and the Globalization of Culture* also suggests several mechanisms by which pragmatic social practices and fictional discourses make their way into the cultural beliefs and traditions of societies. Shaheed Nick Mohammed examines how the modern globalized environment gives rise to cultural practices that demonstrate cultural inventions, imagined communities, and manufactured cultural products suggesting that such inventions and imaginations are not uniquely modern but rather a continuation of cultural inventions that long pre-date our media globalized environment.

Exemplification in

Communication Dolf Zillmann, Hans-Bernd Brosius, 2012-12-06 This volume offers a new conceptual framework for exemplification, a coherent theoretical approach based on contemporary psychological models of information processing and an exhaustive integration of the pertinent research demonstrations. Focus is on the news media but the influence of fiction and quasi-fiction is also considered. The informational competition between concrete verbal or pictorial exemplification and abstract mostly quantitative exposition is analyzed. Implications for issue perception including delayed consequences are also examined. Exemplification is subjected to conceptual scrutiny and a new theoretical framework is offered. Contemporary psychological paradigms are applied to predict effects of various forms of exemplification. Perhaps most important, novel experimental research is presented to document the specific consequences of exemplifications featured in the news even of those featured in fiction. Finally, recommendations for information providers and recipients are derived from the research demonstration in order to advance media literacy specific to exemplification. This unique volume provides a comprehensive account of the power of case report selection in the manipulation of perceptions of social issues, addresses exemplification in communication, i.e. the influence of case reports in the news media primarily on the perception of pertinent social issues, offers an empirical assessment of the practice of issue exemplifying by the media, gives an exhaustive account of representative research on exemplification effects on issue perception primarily by the news media but also by the entertainment media, and includes a compilation of guidelines for information providers and recipients in efforts at creating media literacy with regard to exemplification.
