Mind Hacking Dan Proctor,Jhon Webb,2020-02-24 Have you ever wondered how some people can be so bright and magnetic towards those around them When you affect your mind you have the power over how your brain works To know how you need to know neuroplasticity first For such a complicated word it s actually a very simple concept Think about how at the beginning you didn t know anything about riding a bicycle but as you practiced it over time you became more and more skilled On the other hand if you stopped doing it for a while you would start forgetting to do it So if you pick it up later you should start over and learn all over again This is exactly why negative chatter can get stuck in our heads in a cycle For example if you ve told yourself you ve been unintelligent thousands of times over the years it will become the default way you see yourself That s why it will take more than a few times to tell yourself the opposite to have a real impact on your thoughts You will have to surround yourself with positive reinforcements Write compliments to yourself and put them somewhere so you can see them every day You have to write a thought if you want it to become real Make sure your circle of friends is full

of people lifting you up and if not it's time to make some changes. You are not stuck with the problems you currently have.
