Publisher's description

Environmentally Friendly Production of Pulp and Paper Pratima Bajpai, 2011-03-21 Implementing Cleaner Production in the pulp and paper industry The large and still growing pulp and paper industry is a capital and resource intensive industry that contributes to many environmental problems including global warming human toxicity ecotoxicity photochemical oxidation acidification eutrophication and solid wastes This important reference for professionals in the pulp and paper industry details how to improve manufacturing processes that not only cut down on the emission of pollutants but also increase productivity and decrease costs Environmentally Friendly Production of Pulp and Paper guides professionals in the pulp and paper industry to implement the internationally recognized process of Cleaner Production CP It provides updated information on CP measures in Raw material storage and preparation Pulping processes

Kraft Sulphite and Mechanical Bleaching recovery and papermaking Emission treatment and recycled fiber processing In addition the book includes a discussion on recent cleaner technologies and their implementation status and benefits in the pulp and paper industry Covering every aspect of pulping and papermaking essential to the subject of reducing pollution this is a must have for paper and bioprocess engineers environmental engineers and corporations in the forest products industry

Pulp and Paper Industry Pratima Bajpai,2016-01-22 Pulp and Paper Industry Energy Conservation presents a number of energy efficient technologies and practices that are cost effective and available for implementation today Emerging energy efficient technologies and future prospects in this field are also dealt with Qualitative and quantitative results data on energy savings for various steps of pulp and paper making process are presented There is no specific book on this topic This will be a comprehensive reference in the field Thorough and in depth coverage of energy efficient technologies and practices in paper and pulp industry Presents cost effective and available for implementation today technologies Discusses Biotechnological processes especially enzymatic processes in the pulp and paper industry to reduce the energy consumption and improve the product quality Presents qualitative and quantitative results data on energy savings for various steps of pulp and paper making process **Handbook of Industrial Mixing** Edward L. Paul,Victor A. Atiemo-Obeng,Suzanne M.

Kresta,2004-02-03 Handbook of Industrial Mixing will explain the difference and uses of a variety of mixers including gear mixers top entry mixers side entry mixers bottom entry mixers on line mixers and submerged mixers The Handbook discusses the trade offs among various mixers concentrating on which might be considered for a particular process Handbook of Industrial Mixing explains industrial mixers in a clear concise manner and also Contains a CD ROM with video clips showing different type of mixers in action and a overview of their uses Gives practical insights by the top professional in the field

Details applications in key industries Provides the professional with information he did receive in school **Green Pulp and Paper Industry** Amit Kumar,Puneet Pathak,Dharm Dutt,2021-07-19 This book provides recent developments and future perspectives of pulp and paper processing based on biotechnology to replace conventional environmental unfriendly chemical processes The use of microorganism and microbial enzymes in various processes such as bleaching deinking refining dissolving pulp debarking pitch removal slime control wastewater treatment and waste material valorisation are discussed

Chemistry for Biomass Utilization Raimo Alén,2023-12-04 Much interest has been directed to the versatile possibilities of using lignocellulosic biomass resources i e renewable raw materials for the full scale production of various chemicals and other bioproducts together with solid liquid and gaseous fuels Introduces modern aspects and various technologies of lignocellulosic biomass conversion for producing chemicals biofuels and other products in a reader friendly way Starting with fundamentals of biorefinery the author further describes chemical biochemical and thermal conversion approaches In addition the properties and biorefining principles of non wood biomass feedstock **Surface Analysis of**

Paper Terrance E. Conners,Sujit Banerjee,2020-04-15 First published in 1995 Surface Analysis of Paper examines surface

analysis techniques from a paper industry perspective and places heavy emphasis on applications Modern techniques including ion mass spectrometry infrared spectroscopy and optical profilometry are reviewed in a straightforward manner This new book provides details on widely used methods and instruments and discusses how they can be used to attain for example contour maps of the microscopic constituents on paper surfaces and accurate analyses of the physical properties of paper Organized into three sections Surface Analysis of Paper provides thorough coverage of the physical characteristics of paper and a clear picture of new and emerging analytical methods Carefully chosen background material on fundamental concepts is included wherever such material assists in understanding the uses of analysis methods Each chapter contains An introduction A description of the technique A discussion of the type of information that can be obtained with the particular technique Practical examples to demonstrate the advantages of the technique Defoaming P.R. Garrett,2017-12-14 Reviews all known antifoam mechanisms and discusses the appropriate practical approaches for solving foam control problems in a variety of industrial contexts These range from crude oil production to detergent formulation *Current Developments in Biotechnology and Bioengineering* Duu-Jong Lee,Patrick C. Hallenbeck,Huu Hao Ngo,Veeriah Jegatheesan,Ashok Pandey,2016-09-19 *Current Developments in Biotechnology and Bioengineering* Biological Treatment of Industrial Effluents provides extensive coverage of new developments state of the art technologies and potential future trends in data based scientific knowledge and advanced information on the role and application of environmental biotechnology and engineering in the treatment of industrial effluents These treatment processes have been broadly classified under aerobic and anaerobic processes which determines the scope and level of pollutant removal Chapters in this volume review the most recent developments and perspectives at different environmental cleanup operation scales Outlines available biochemical processes for the treatment of solid industrial waste Covers aerobic and anaerobic treatments their mechanisms and selection criteria Highlights specific industrial applications such as anammox processes
