articles to be used as a point of entry for undergraduate students or as a tool for active researchers looking for the latest information in the field Entries cover a range of topics including Behavioral Ecology Ecological Processes Ecological Modeling Ecological Engineering Ecological Indicators Ecological Informatics Ecosystems Ecotoxicology Evolutionary Ecology General Ecology Global Ecology Human Ecology System Ecology The first reference work to cover all aspects of ecology from basic to applied Over 500 concise stand alone articles are written by prominent leaders in the field Article text is supported by full color photos drawings tables and other visual material Fully indexed and cross referenced with detailed references for further study Writing level is suited to both the expert and non expert Available electronically on ScienceDirect shortly upon publication

Ecosystem Classification for Environmental Management Frans

Klijn,2013-03-09 When Lovelock published his Gaia it was for many people quite a relief We would not be able to destroy life on earth Lovelock illustrated this argument with a wealth of mechanistic feedback processes as we know them to occur in ecosystems These feedback processes would somehow lead the earth as a whole into a new equilibrium An equilibrium with life within be it in an entirely changed environment This is indeed let us be earnest a functioning ecosystem But what kind of ecosystem The Gaia hypothesis triggered a great deal of thought and discussion about what we actually require as an environment Bio diversity as an abbreviation of biotic diversity has since become the focal point of societal concern But again when we think about it we are not only interested in the sheer number of species on earth We also have ther interests nearby in our backyards in the surrounding countryside and on the various locations where we would like to spend our holidays We also want to preserve rare or characteristic species just for their own sake In fact we want species in viable populations to be part of communities that are self maintaining in environments where they belong We know we cannot ask for this without protecting their environment which is also our environment This is where the next fashionable term emerges sustainability
