The Social Life of Emotions Larissa Z. Tiedens, Colin Wayne Leach, 2004-09-27 This book showcases new research and theory about the way in which the social environment shapes and is shaped by emotion The book has three sections each of which addresses a different level of sociality interpersonal intragroup and intergroup The first section refers to the links between specific individuals the second to categories that define multiple individuals as an entity and the final to the boundaries between groups Emotions are found in each of these levels and the dynamics involved in these types of relationship are part of what it is to experience emotion The chapters show how all three types of social relationships generate and are generated by emotions In doing so this book locates emotional experiences in the larger social context

Tracing the Life Cycle of Ideas in the Humanities and Social Sciences Arjuna Tuzzi, 2018-10-30 This book demonstrates how quantitative methods for text analysis can successfully combine with qualitative methods in the study of different disciplines of the Humanities and Social Sciences HSS The book focuses on learning about the evolution of ideas of HSS disciplines through a distant reading of the contents conveyed by scientific literature in order to retrieve the most relevant topics being debated over time Quantitative methods statistical techniques and software packages are used to identify and study the main subject matters of a discipline from raw textual data both in the past and today The book also deals with the concept of quality of life of words and aims to foster a discussion about the life cycle of scientific ideas Textual data retrieved from large corpora pose interesting challenges for any data analysis method and today represent a growing area of research in many fields New problems emerge from the growing availability of large databases and new methods are needed to retrieve significant information from those large information sources This book can be used to explain how quantitative methods can be part of the research instrumentation and the toolbox of scholars of Humanities and Social Sciences The book contains numerous examples and a description of the main methods in use with references to literature and available software Most of the chapters of the book have been written in a non technical language for HSS researchers without mathematical computer or statistical backgrounds *Moral Development, Self, and Identity* Daniel K.
