importance of promoting forms of local development based on endogenous valuable resources natural and cultural leading to the enhancement of the territorial heritage and the emergence of opportunities for growth for all communities due to the spread of new technologies The territorial heritage includes all the factors that characterize a territory that can be transformed into valuable resources capable of generating competitive advantage becoming levers of development It follows that the proper management and enhancement of local resources can represent a source of well being and growth both in economic and social terms The starting point must be the recognition of the heritage present in a territory and the recognition of the value including potential value Strategies for Sustainable Territorial Development contributes to the process of raising awareness about the importance of local resources as a lever for sustainable development that can support the territory both in terms of economic growth and in terms of social progress It is developed based on three trajectories namely the recognition and enhancement of the territorial heritage sustainability as an approach to the use of resources and an objective of development and innovation as a tool for achieving a correct and rational use of resources Covering topics such as foreign trade industrial parks and cultural heritage this book is an excellent resource for government officials policymakers sustainability advocates professionals researchers scholars academicians and more

Advances in Local Public Economics Minoru Kunizaki, Kazuyuki Nakamura, Kota Sugahara, Mitsuyoshi Yanagihara, 2019-02-23 This book introduces recent developments in both theoretical and empirical analyses of local public economics Theories of those economics as well as empirical analyses have been developed dramatically in various directions in recent years One direction has been to reflect real economic circumstances especially in Japan In the early 2000s Japan experienced the so called great merger or consolidation of municipalities in the Heisei era 1999 through the present with the number of municipalities shrinking from 3 232 to 1 821 for increasing administrative and financial efficiency This phenomenon is mainly due to a drastic change in demography in Japan the diminishing birthrate and aging population Following the consolidation regional coordination has been undertaken to raise overall administrative and financial efficiency In sum various types of public policies for tackling the decreasing birthrate and aging population have been carried out Urban sprawl and the timing of municipal mergers are dealt with from a broad point of view and public child care services and tax competition are investigated from a policy standpoint Another direction has been to incorporate new ideas for forming theoretical frameworks for local public finance most of which have been based on

static situations In the recent trend toward globalization local governments have attended not only to the welfare of residents but also to the interests of regional economic development In addition decision making by local governments has tended to be affected by political activities Thus the endogenous growth setting and lobbying activities for the activities of local governments are discussed in the book With these new directions for analyses the author tackles the topics of tax competition cross border shopping local provision of public goods and soft budgets thus covering a broad range of aspects of local public finance
