Urban Rivers Stephane Castonguay, Matthew Evenden, 2012-05-10 *Urban Rivers* examines urban interventions on rivers through politics economics sanitation systems technology and societies

how rivers affected urbanization spatially in infrastructure territorial disputes and in flood plains and via their changing ecologies Providing case studies from Vienna to Manitoba the chapters assemble geographers and historians in a comparative survey of how cities and rivers interact from the seventeenth century to the present Rising cities and industries were great agents of social and ecological changes particularly during the nineteenth century when mass populations and their effluents were introduced to river environments Accumulated pollution and disease mandated the transfer of wastes away from population centers In many cases potable water for cities now had to be drawn from distant sites These developments required significant infrastructural improvements creating social conflicts over land jurisdiction and affecting the lives and livelihood of nonurban populations The effective reach of cities extended and urban space was remade By the mid twentieth century new technologies and specialists emerged to combat the effects of industrialization Gradually the health of urban rivers improved From protoindustrial fisheries mills and transportation networks through industrial hydroelectric plants and sewage systems to postindustrial reclamation and recreational use Urban Rivers documents how Western societies dealt with the needs of mass populations while maintaining the viability of their natural resources The lessons drawn from this study will be particularly relevant to today's emerging urban economies situated along rivers and waterways

Versteckt Birgit Schreiber,2005 Analyzes the experiences of five Jews who as children were hidden by non Jews in Germany during World War II Erika Koschinski Israel Harry Young USA and Lore Fr hling Lara Schwarz and J rgen Haverkamp Germany The subjects mentioned their pain and their ambivalent feelings toward Germans and toward their parents who they felt had abandoned them Contends that there is no typical hidden child and that surviving in hiding is a

very individual experience Discusses difficulties in the relationships between the children and their rescuers States that the murder of or threat to relatives was almost as traumatic for the children as their own persecution Concludes that society as well as individual contacts can help alleviate the effects of the trauma of having been hidden and that former hidden children who survived in the midst of non Jewish Germans having learned to deal with ambivalent or conflicting loyalties are more competent in approaching non Jews than other Holocaust survivors
