The volume reviews transitions made in different areas of human activity, assesses their relevancy, and analyzes their contexts. During this century, different organizations and institutions will undergo a level of radical and global change that has rarely been seen. The expected shift must be addressed in terms of a multidimensional transition toward building a sustainable society. Do we have an understanding of transition relevant to the task of meeting at least some of the challenges presented in this volume? Do we need a radical innovation for redesigning the transition that may enforce real social and ethical responsibilities into organizational practice on different levels and bring to life new ideas? *Transition Redesigned* seeks to answer these questions.
