Modernization in the United Arab Emirates? Helena Rietmann, 2021-07-19 In 2006 the United Arab Emirates initiated the Masdar City project which was a pre planned eco city concentrating on the development and promotion of renewable energy water and waste management sustainable building transportation and material efficiency It was the flagship project of what the government considered to be a widespread environmental reform process This study examines the Masdar City project applying the analytical framework of ecological modernization with the help of five factors which help to investigate the ongoing reform process The study finds that Masdar City is more accurately described as an outcome of the Abu Dhabi government's economic diversification strategy The project is subject to the political and economic interests of the emirate's ruling family Environmental groups operating within the emirate are connected to the government and pursue policy targets determined by the government *Furthering Environmental Impact Assessment* Anastassios Perdicoulis, Bridget

Durning, Lisa Palframan, 2012-01-01 The environmental impact of development projects is currently studied and mitigated from two distinct perspectives before and after project implementation with environmental impact assessment EIA and environmental management systems EMS being the main instruments on the respective sides This double perspective creates a discontinuity in the way environmental impacts are analysed an issue that has been noted by both academics and practitioners This book gathers and presents both theoretical and actual examples to link EIA with EMS and explores ways to overcome difficulties and provide innovative solutions Academic researchers advanced students EIA practitioners and EMS practitioners will find the book essential for the theoretical explorations of how the link might occur and practical examples in which to explore and critique these theories *Osh Induction Program in Enhancing Safety Awareness Amongst*

Fabrication Workers in Brooke Dockyard, Kuching, Sarawak Andrew Anak Ronggie, 2016-01-05 This academic research is

conducted to examine the occupational safety and health induction program in enhancing safety awareness amongst fabrication workers For that purpose this study will be conducted within Brooke Dockyard and Engineering Works Corporation BDEWC focusing on employees who are involved directly or indirectly with fabrication works There were two main research methodologies applied namely direct observation and personal survey using structured questionnaire forms A number of 175 employees are targeted as respondents which will cover the various sections within the abovementioned department Statistical Package for Social Sciences SPSS Version 19 0 has been applied to conduct the entire analysis such as to generate descriptive analysis and inferential statistic An expected result consists of the Cronbachs Alpha level for the overall constructs in this study should be above 0 700 and detail analysis of study findings as elaborated in Chapter IV In depth analysis such as Pearsons Coefficient ANOVA and T Test had been applied to answer the researchs aim and objectives in addition to prove the acceptance level of researchs hypotheses From the study findings a number of recommendations were suggested to be adopted in line to enhance the organization productivity with greater safety working environment and excellent safety culture
