Die vorliegende Studie ist ein Beitrag zur Untersuchung der Frage, inwieweit die Anwendung von Statistiken in der Entscheidungsfindung von Führungskräften zu einer Verbesserung der Entscheidungsfindung führt. Die Studie ist eine experimentelle Studie, bei der die Teilnehmer in zwei Gruppen unterteilt wurden. Die eine Gruppe erhielt eine Schulung in der Anwendung von Statistiken, während die andere Gruppe keine Schulung erhielt. Die Teilnehmer wurden dann in einer Reihe von Entscheidungsfindungssituationen konfrontiert, in denen die Anwendung von Statistiken erforderlich war. Die Ergebnisse der Studie zeigen, dass die Teilnehmer, die eine Schulung in der Anwendung von Statistiken erhalten hatten, in der Lage waren, bessere Entscheidungen zu treffen als die Teilnehmer, die keine Schulung erhalten hatten. Diese Ergebnisse deuten darauf hin, dass die Anwendung von Statistiken in der Entscheidungsfindung von Führungskräften zu einer Verbesserung der Entscheidungsfindung führt.

Schintler, 2006-03-30 One aspect of the new economy is a transition to a networked society and the emergence of a highly interconnected interdependent and complex system of networks to move people goods and information An example of this is the increasing reliance of networked systems e g air transportation networks electric power grid maritime transport etc on telecommunications and information infrastructure Many of the networks that evolved today have an added complexity in that they have both a spatial structure i e they are located in physical space but also an a spatial dimension brought on largely by their dependence on information technology They are also often just one component of a larger system of geographically integrated and overlapping networks operating at different spatial levels An understanding of these complexities is imperative for the design of plans and policies that can be used to optimize the efficiency performance and safety of transportation telecommunications and other networked systems In one sense technological advances along with economic forces that encourage the clustering of activities in space to reduce transaction costs have led to more efficient network structures At the same time the very properties that make these networks more efficient have also put them at a greater risk for becoming disconnected or significantly disrupted when super connected nodes are removed either intentionally or through a targeted attack **Annual Conference Proceedings, Roads and Transportation Association of Canada**, 1976 Journal of the Institute of Transport, 1927 Public Transit Planning and Operation Avishai Ceder, 2016-03-09 Addresses the Challenges Facing Public Transport Policy Makers and Operators Public Transit Planning and Operation Modeling Practice and Behavior Second Edition offers new solutions for delivering both better services and greater efficiency solutions which have been developed and tested by the author in over thirty years of research work with mass transit policy makers and operators all over the world It bridges the worlds of practice and research and academia provides an overview and a critique of currently used operational planning methods and furnishes innovative practical techniques and modeling Improve Service Performance and Successfully Manage the Costs of
