Morgan Richard Tsvangirai's Legacy Ngonidzashe Marongwe, 2022-03-11 Morgan Richard Tsvangirai is arguably the most polarising figure and advocate of democracy and human rights in the history of opposition politics in Zimbabwe. He is as much a topic of debate in Zimbabwe and beyond as the late president Robert Gabriel Mugabe. Tsvangirai's legacy like Mugabe's remains indisputably controversial and conflicted. Broadly the divided opinion on the Tsvangirai legacy can be represented firstly by those who argue that Tsvangirai was the champion of democracy and the face of the struggle for human rights in Zimbabwe. In this light Tsvangirai has been variously described as a selfless people's hero, a colossus of the struggle for democracy, the commander of the struggle, a symbol of courage and resistance and the doyen of constitutionalism in Zimbabwe. On the other hand, critics have described Tsvangirai as a sell-out, a Judas Iscariot, traitor and coward among other nefarious and pejorative characterisations. Drawing on all these opinions and the various characterisations of Tsvangirai, this book provides a comprehensive and multi-disciplinary appraisal of a gigantic trade unionist and political figure who in his life and in death inspires different narratives, emotions and values. This book is therefore about a mortal but living figure who left an indelible mark on Zimbabwe, Africa and the rest of the world in fields such as trade unionism, governance and politics. As such, the book is handy for students and practitioners in African studies, political science, policy studies, economics, history, global studies and development studies.

Professionalism in the Built Heritage Sector Koen van Balen, Aziliz Vandesande, 2019-03-14 Professionalism entails the conduct, aims and qualities that characterise a profession. The term is also used to describe education and training standards for the knowledge and skills necessary to perform a specific profession. In practice, professional standards of practice and ethics are agreed upon and maintained by recognised associations. In the past, professionalism has not occupied a central place in built heritage discussions, policy and research. Recent changes in terms of public attitudes and sustainability concerns have had a cumulative impact on the requirements for professionalism in the built heritage sector. The future success of the sector will depend on the availability of adequate professionals and an appropriately skilled workforce. In practice, the built heritage sector involves much more than interventions to conserve, preserve, rehabilitate or restore a heritage structure. Bringing a project to fruition begins with the formulation of a policy, proceeds to the design and execution of intervention strategies and ends with ongoing maintenance of heritage structures and related future programming. This process requires sufficient interactions between different professionals to obtain a common vision and hold that vision throughout a project. At the same time, the sustainability of the sector is also defined by effective governance, societal support

and cultural rationales Professionalism in the Built Heritage Sector contains reports on the lectures of the international conference organized by the Raymond Lemaire International Centre for Conservation Leuven Belgium February 5th 8th 2018 The contributions in this volume meet the increasing demand for shared information to support the transition towards a more sustainable conservation process The volume consists of three main parts that deal with practice led research or scientific research Profiles and capacities Education training and quality labels and Obstacles and changes

GMOs, Consumerism and the Global Politics of Biotechnology Mawere, Munyaradzi, Nhemachena, Artwell, 2017-08-16 Despite sustained continental and national struggles for autonomy sovereignty and independence in postcolonial Africa the continent is increasingly embattled by the forces of globalisation which threaten African identity that is at the core of African struggles for continental and national unity Situating the debates in the contemporary discourses on decoloniality global consumerism global food apartheid and the challenges and prospects of the emergent sharing economies this book critically examines the importation use and implications of genetically modified organisms GMOs and other such non food products on African bodies institutions and cultures The book poses questions about how Africa can be decolonised both politically and in terms of global food apartheid and the dehumanising importation and use of foreign non food products some of which militate against the ethos of African identity Renaissance and indigeneity On note the book urges the African continent to ensure the safety of imports ensuing from the global flows and circulations that are mired in the resilient invisible global matrices of power **Heritage for development in South-East Europe** Council of Europe, 2015-05-22 The essays in this book present for the first time in published form a systematic comparative overview of cultural heritage policy and its impact specifically in the field of immovable heritage such as archaeological and historic sites in Albania Bosnia and Herzegovina Bulgaria Croatia The former Yugoslav Republic of Macedonia Montenegro Romania and Serbia The studies focus on the decade from 2003 to 2013 that followed the traumatic and often violent upheavals associated with the breakdown of communism That same period also saw a shift in the policy of the European Union and the Council of Europe in support of cultural heritage policies in the region which led to the launching of the Ljubljana Process rehabilitating our common heritage The challenges gradually moved from encouraging professionals to adopt European standards and realising

the potential of heritage to build bridges between peoples and to foster reconciliation towards highlighting its wider benefits as a catalyst of economic development for the local economy and the quality of life of citizens. Theorists and practitioners will gain a better insight into the value of cultural heritage and the specificity of cultural heritage policies in South East Europe as well as the underlying facts, vision, context and impact of the Ljubljana Process. This will encourage questioning of existing public policies as well as the promotion and affirmation of cultural heritage within a new culture of development.

Neocolonialism and Built Heritage Daniel E. Coslett, 2019-07-02 Architectural relics of nineteenth and twentieth century colonialism dot cityscapes throughout our globalizing world just as built traces of colonialism remain embedded within the urban fabric of many European capitals. Neocolonialism and Built Heritage addresses the sustained presence and influence of historic built environments and processes inherited from colonialism within the contemporary lives of cities in Africa, Asia and Europe. Novel in their focused consideration of ways in which these built environments reinforce neocolonialist connections among former colonies and colonizers, states and international organizations, the volume's case studies engage highly relevant issues such as historic preservation, heritage management, tourism, toponymy and cultural imperialism. Interrogating the life of the past in the present, authors thus challenge readers to consider the roles played by a diversity of historic built environments in the ongoing asymmetrical balance of power and unequal distribution of capital around the globe. They present buildings, maintenance, management, reuse and re-interpretation and in so doing they raise important questions the ramifications of which transcend the specifics of the individual sites and architectural histories they present.

The Business of Heritage Darran Jordan, 2020-06-04 Throughout the world, consultant archaeologists are at work on heritage assessments covering a broad range of fields, subjects, techniques, locations and connections. Due to government legislations to protect heritage, an industry has developed where archaeology is inextricably linked to business. The result is the production of a vast amount of material not widely seen, with the result of the heritage work often remaining unpublished. This collection of papers examines how heritage is undertaken as a business and what this means for the ongoing protection of the past and development of archaeological knowledge. The international connections of a global business structure present an opportunity to approach heritage and archaeological studies with a global, one-world view parallel with the corporate approach practiced by an international company. This volume collects papers by archaeologists and heritage specialists from around the globe, providing insights into the intentions, processes and outcomes of an international heritage consultancy in operation. From managing heritage structures associated with space exploration at the NASA Ames Research Center to protecting Roman archaeology in North Yorkshire and from an industrial landscape in Cornwall to a palimpsest of Aboriginal artefacts in Australia, this book contextualises international consultancy within a broader milieu of archaeological study and documents the way in which an international business contributes to the development of academic knowledge on a world scale.
