

JONATHAN
KINGDON

A detailed illustration of human evolution. It shows a sequence of figures from left to right, starting with a small, crouching hominid and progressing through various stages of upright walking and standing. The figures are rendered in a light, sketchy style, with some in shades of brown and others in grey. The background is a light, textured surface with faint, larger-scale illustrations of the same evolutionary sequence.

Lowly Origin Where When And Why Our Ancestors First Stood Up:

Lowly Origin Jonathan Kingdon, 2021-01-12 Our ability to walk on two legs is not only a characteristic human trait but one of the things that made us human in the first place Once our ancestors could walk on two legs they began to do many of the things that apes cannot do cross wide open spaces manipulate complex tools communicate with new signal systems and light fires Titled after the last two words of Darwin's *Descent of Man* and written by a leading scholar of human evolution *Lowly Origin* is the first book to explain the sources and consequences of bipedalism to a broad audience Along the way it accounts for recent fossil discoveries that show us a still incomplete but much bushier family tree than most of us learned about in school Jonathan Kingdon uses the very latest findings from ecology biogeography and paleontology to build a new and up to date account of how four legged apes became two legged hominins He describes what it took to get up onto two legs as well as the protracted consequences of that step some of which led straight to modern humans and others to very different bipeds This allows him to make sense of recently unearthed evidence suggesting that no fewer than twenty species of humans and hominins have lived and become extinct Following the evolution of two legged creatures from our earliest lowly forebears to the present Kingdon concludes with future options for the last surviving biped A major new narrative of human evolution *Lowly Origin* is the best available account of what it meant and what it means to walk on two feet **The**

Book of Barely Imagined Beings Caspar Henderson, 2022-12-22 Caspar Henderson takes us on an eye opening tour of real animals that no sane human could ever have invented Frans de Waal New York Times bestselling author With *The Book of Barely Imagined Beings* Caspar Henderson offers readers a fascinating beautifully produced modern day menagerie But whereas medieval bestiaries were often based on folklore and myth the creatures that abound in Henderson's book from the axolotl to the zebrafish are with one exception very much with us albeit sometimes in depleted numbers *The Book of Barely Imagined Beings* transports readers to a world of real creatures that seem as if they should be made up that are somehow more astonishing than anything we might have imagined The yeti crab for example uses its furry claws to farm the bacteria on which it feeds The waterbear meanwhile is among nature's extreme survivors able to withstand a week unprotected in outer space These and other strange and surprising species invite readers to reflect on what we value or fail to value and what we might change A powerful combination of wit cutting edge natural history and philosophical meditation *The Book of Barely Imagined Beings* is an infectious and inspiring celebration of the sheer ingenuity and variety of life in a time of crisis and change *The Book of Barely Imagined Beings* is one that Pliny would have envied Darwin applauded and Borges relished In these days of doom and gloom I can think of nothing more rejoicing than Caspar Henderson's magical book Alberto Manguel author of *A History of Reading* Magnificent bravura beautiful and astoundingly interesting *The Sunday Times* Spell binding brilliantly executed extraordinary *The Guardian* **The Ancestor's Tale** Richard Dawkins, Yan Wong, 2016-04-28 A fully updated edition of one of the most original accounts of evolution ever written featuring new fractal diagrams six new

tales and the latest scientific developments THE ANCESTOR S TALE is a dazzling four billion year pilgrimage to the origins of life Richard Dawkins and Yan Wong take us on an exhilarating reverse journey through evolution from present day humans back to the microbial beginnings of life It is a journey happily interrupted by meetings of fellow modern animals as well as plants fungi and bacteria similarly tracing their evolutionary path back through history As each evolutionary pilgrim tells their tale Dawkins and Wong shed light on topics such as speciation sexual selection and extinction Written with unparalleled wit clarity and intelligence taking in new scientific discoveries of the past decade and including new tales illustrations and fractal diagrams THE ANCESTOR S TALE shows us how remarkable we are how astonishing our history and how intimate our relationship with the rest of the living world

The Crucible of Language Vyvyan Evans,2015-02-16 From the barbed childish taunt on the school playground to the eloquent sophistry of a lawyer prising open a legal loophole in a court of law meaning arises each time we use language to communicate with one another How we use language to convey ideas make requests ask a favour and express anger love or dismay is of the utmost importance indeed linguistic meaning can be a matter of life and death In The Crucible of Language Vyvyan Evans explains what we know and what we do when we communicate using language he shows how linguistic meaning arises where it comes from and the way language enables us to convey the meanings that can move us to tears bore us to death or make us dizzy with delight Meaning is he argues one of the final frontiers in the mapping of the human mind

Ecological Intelligence: Rediscovering Ourselves in Nature (Easyread Large Edition) Ian McCallum,2009-12 A best seller in Africa Ecological Intelligence defines a new way of thinking about the unprecedented environmental pressures of our day Ian McCallum offers a compelling argument that we must think differently about ourselves and the earth if we are to take seriously the survival of wilderness areas wild animals and the human race He explores the relationship between humans and nature from both a biological and poetic perspective articulating a wild and ethical imperative an urgent reminder that we are inextricably linked to the land and that we must not be the creatures of our own undoing A profound and necessary book about an important idea Something like this had to be done Lyall Watson best selling author of Supernature

Baobab John Rashford,2023-06-28 Modern humans descendants of a founding population that separated from chimpanzees some five to eight million years ago are today the only living representative of a branching group of African apes called hominins Because of its extraordinary size and shape the baobab *Adansonia digitata* L. has long been identified as the most striking tree of Africa s mosaic savanna the landscape generally regarded as the environment of hominin evolution This book makes the case for identifying the baobab as the tree of life in the hunter gatherer adaptation that was the economic foundation of hominin evolution The argument is based on the significance of the baobab as a resource rich environment for the Hadza of northeastern Tanzania who continue to be successful hunter

gatherers of the African savanna **Muscles and Meridians** Phillip Beach,2010-11-25 Muscles and Meridians is a unique book that breaks new conceptual ground in the realm of human movement Exploring the connection between evolutionary biology and Chinese meridians the volume offers a novel and effective system of diagnosis and treatment of common musculoskeletal disorders Describes a new model of human movement the Contractile Field model Offers a rare and serious attempt to look at whole person movement patterns akin to Anatomy Trains but with a stronger link to vertebrate evolution and development Suggests that much of our endemic back and leg pain is due to a loss of ease in postures that are archetypal to mankind Offers a profound new understanding of the world s oldest medical map the Chinese meridian map

The Roots of Morality Maxine Sheets-Johnstone,2010-11-01 *Apes and Human Evolution* Russell H. Tuttle,2014-02-17 Russell Tuttle synthesizes a vast literature in primate evolution and behavior to explain how apes and humans evolved in relation to one another and why humans became a bipedal tool making culture inventing species distinct from other hominoids He refutes the theory that we are sophisticated instinctively aggressive and destructive killer apes

Illness and Image Sander L. Gilman,2018-01-16 The humanities in higher education are too often labeled as impractical

and are not usually valued in today's marketplace Yet in professional fields such as the health sciences interest in what the humanities can offer has increased Advocates claim the humanities offer health care professionals greater insight into how to work with those who need their help *Illness and Image* introduces undergraduates and professionals to the medical humanities using a series of case studies beginning with debates about male circumcision from the ancient world to the present to the meanings of authenticity in the face transplantation arena The case studies address the interpretation of mental illness as a disability and the new category of mental illness self harm Sander L Gilman shows how medicine projects such categories existence into the historical past to show that they are not bound in time and space and therefore are real *Illness and Image* provides students and researchers with models and possible questions regarding categories often assumed to be either trans historical or objective making it useful as a textbook **Why Evolution is True** Jerry A.

Coyne,2010-01-14 For all the discussion in the media about creationism and Intelligent Design virtually nothing has been said about the evidence in question the evidence for evolution by natural selection Yet as this succinct and important book shows that evidence is vast varied and magnificent and drawn from many disparate fields of science The very latest research is uncovering a stream of evidence revealing evolution in action from the actual observation of a species splitting into two to new fossil discoveries to the deciphering of the evidence stored in our genome *Why Evolution is True* weaves together the many threads of modern work in genetics palaeontology geology molecular biology anatomy and development to demonstrate the indelible stamp of the processes first proposed by Darwin It is a crisp lucid and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution *Interpreting the Past* Daniel Lieberman,Richard W.

Smith,Jay Kelley,2005-11-01 This volume published in honor of the occasion of David Pilbeam's 65th birthday covers major topics in human primate and mammalian evolution mostly from the Miocene to the present The papers emphasize novel interpretations of several key areas of longstanding interest and importance including Miocene biogeography and hominoid evolution the origins of hominids and new interpretations of the hominid fossil record In terms of content most of the papers tackle key issues in the evolution of hominoids and hominids in terms of systematic paleoenvironmental and behavioral questions More broadly however the papers explore the epistemological problems of how one interprets the past from the available data *Victorian legs* Clayton Tarr,2025-09-02 *Victorian legs* is about the science sometimes spurious and

sexuality often frivolous of legs during the Victorian period The book argues that legs occupy a particularly vexed position in Victorian culture Strong legs formed the foundation or the columns of the civilized subject but the politics of who could show their legs remained gendered For the most part men exhibited and admired while women concealed and demurred This book not only joins and advances the lively critical discourse on the Victorian body but also marks new paths to pursue While legs made us human they could also dehumanize God, Humanity and the Cosmos - 3rd Edition Christopher

Southgate,2011-12-15 Principles of Evolutionary Medicine Peter D. Gluckman,Alan Beedle,Tatjana Buklijas,Felicia

Low, Mark A. Hanson, 2016 A new updated edition of the first integrated and comprehensive textbook to explain the principles of evolutionary biology from a medical perspective and to focus on how medicine and public health might utilise evolutionary biology

Conserving Africa's Mega-Diversity in the Anthropocene Joris P. G. M. Cromsigt, Sally Archibald, Norman Owen-Smith, 2017-03-02 Centring on South Africa's Hluhluwe iMfolozi Park this book synthesizes a century of insights from the ecology and conservation management of one of Africa's oldest protected wildlife areas The park provides important lessons for conservation management as it has maintained conservation values rivalling those of much larger parks sometimes through and sometimes despite strong management interventions including the rescue of the white rhino from extinction In addition the book highlights the ecological science produced in the park much of which has become widely influential including the megaherbivore concept new functional approaches to understanding biomes and new understandings about the role of consumers in shaping ecosystems The volume is ideal for researchers and policymakers interested in the conservation of relatively small isolated and protected areas

God, Humanity and the Cosmos Christopher Southgate, 2005-10-29 Contributors include Christopher Southgate John Hedley Brooke Celia Deane Drummond Paul D Murray Michael Robert Negus Lawrence Osborn Michael Poole Jacqui Stewart Fraser Watts David Wilkinson This fully revised and updated edition of God Humanity and the Cosmos includes new chapters by John Hedley Brooke Paul D Murray and David Wilkinson In addition to a systematic exploration of contemporary perspectives in physics evolutionary biology and psychology as they relate to theological descriptions of the universe humanity and consciousness the book now provides a thorough survey of the theological philosophical and historical issues underpinning the science religion debate Contributors also examine such issues as theological responses to the ecological crisis and to biotechnology how science is treated and valued in education and the relation of science to Islamic thought Dr Christopher Southgate is Lecturer in Theology at the University of Exeter
