Eldenburg,Albie Brooks,Judy Oliver,Gillian Vesty,Rodney Dormer,Vijaya Murthy,Nick Pawsey,2020-01-21 Eldenburg s fourth edition of Management Accounting combines the basic technical issues associated with cost management management accounting and control with more recent and emerging themes and issues Management Accounting is a compulsory element of the accounting major and this text is written to cover the content typically taught in the two management accounting units offered in most accounting programs The Management Accounting interactive e text features a range of instructional media content designed to provide students with an engaging learning experience This includes case videos interactive problems and questions with immediate feedback Eldenburg s unique resource can also form the basis of a blended learning solution for lecturers **Accounting Information Systems for Decision Making** Daniela Mancini,Eddy H. J. Vaassen,Renata Paola Dameri,2013-04-18 This book contains a collection of research papers on accounting information systems including their strategic role in decision processes within and between companies An accounting system is a complex system composed of a mix of strictly interrelated elements such as data information human resources IT tool accounting models and procedures Accounting information systems are often considered the instrument by default for accounting automation This book aims to sketch a clear picture of the current state of AIS research including design acceptance and reliance value added decision making interorganizational links and process improvements The contributions in this volume emphasize that AIS has grown into a powerful strategic tool The book provides evidence for this observation by examining a wide range of current issues ranging from theory development in AIS to practical applications of accounting information systems In particular it focuses on themes of growing interest in the realm of XBRL and Financial Reporting Management Information Systems IT IS Audit and IT IS Compliance The book will be of interest to financial and managerial accountants and IT IS practitioners including information systems managers and consultants *Management Scholarship and Organisational Change* Miriam Green,2019-01-08 Change is a crucial and inescapable process for many organisations It remains a constant challenge for managers and many change management initiatives fail Burns and Stalker s seminal text on managing change The Management of Innovation has often been used as a basis for research in mainstream management journals and has been represented as an important theory in popular and long established management textbooks The issues raised in that book are still being grappled with by academics and practitioners today Miriam Green provides a critical analysis of the mainstream construction of knowledge on change management through an examination of representations of that text The main thesis of her book is that this literature though valuable does not provide a full picture Its objectivist approach ignores the role of other factors raised in the original study These factors include the effects of power politics resistance and employee influence on the outcomes of managerial change strategies and on other organisational processes with important consequences for the understanding of change

initiatives by both academics and practitioners This is part of an ongoing debate in management studies and more widely in the social sciences about theoretical approaches and research methods The originality of this book lies in its in depth comparison of an entire monograph on organisations facing technological and commercial change with an equally in depth analysis of the ways this work has been represented and used as a basis for teaching and research It highlights the limitations of the exclusive use of one approach to explain the complications arising from organisational change It challenges the scientific justification offered for that approach and supports arguments for more inclusive and sustainable scholarship of greater relevance to academics managers and other organisational stakeholders
