that educational practices and methods would greatly benefit from reflection on the implicit assumptions and paradigms behind those practices and debates the role that humanism and humanities might play in the formation of new managerial literates The book examines three themes that have emerged as central to the contemporary debate on management education the profession of management humanism as a philosophy and worldview and the humanities as an academic field where management schools could find new inspirations for curricula All three themes are scrutinized in a frame of reference extended between two different points of view the traditional view with its tendency to idealize and even sometimes romanticize humanism the humanities and management as a social function and the past modern view which is inclined to skepticism and to the deconstruction of social and cultural phenomena Providing a lively account of this ongoing debate and exploring new trends and experiences in management education this book will be invaluable reading for teachers students and researchers of management management strategy and organizational behaviour **Wiley CMAexcel Learning System**

Managerial Accounting with Connect Plus Ray Garrison, Eric Noreen, Peter Brewer, 2011-04-11. As the long time #1 best seller, Garrison has helped guide close to 3 million students through managerial accounting since it was first published. It identifies the three functions managers must perform within their organizations: plan, operations, control, activities, and make decisions, and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it. Garrison's Managerial Accounting is known for its relevance, accuracy, and clarity. It is also unique in that the authors write the most important supplements that accompany the book: solutions manual, test bank, instructor's manual, and study guide, making them both of high quality and extremely consistent with the textbook.
