Managing Data In Motion Data Integration Best Practice Techniques And Technologies The Morgan Kaufmann Series On Business Intelligence:

Managing Data in Motion April Reeve, 2013-02-26 Managing Data in Motion describes techniques that have been developed for significantly reducing the complexity of managing system interfaces and enabling scalable architectures. Author April Reeve brings over two decades of experience to present a vendor neutral approach to moving data between computing environments and systems. Readers will learn the techniques, technologies, and best practices for managing the passage of data between computer systems and integrating disparate data together in an enterprise environment. The average enterprise's computing environment is comprised of hundreds to thousands of computer systems that have been built, purchased, and acquired over time. The data from these various systems needs to be integrated for reporting and analysis, shared for business transaction processing, and converted from one format to another when old systems are replaced and new systems are acquired. The management of the data in motion in organizations is rapidly becoming one of the biggest concerns for business and IT management. Data warehousing and conversion, real time data integration, and cloud and big data applications are just a few of the challenges facing organizations and businesses today. Managing Data in Motion tackles these and other topics in a style easily understood by business and IT managers as well as programmers and architects. Presents a vendor neutral overview of the different technologies and techniques for moving data between computer systems, including the emerging solutions for unstructured as well as structured data types. Explains in non-technical terms the architecture and components required to perform data integration. Describes how to reduce the complexity of managing system interfaces and enable a scalable data architecture that can handle the dimensions of Big Data. *Software Quality.*

Software and Systems Quality in Distributed and Mobile Environments Dietmar Winkler, Stefan Biffl, Johannes Bergsmann, 2015-01-05 This book constitutes the refereed proceedings of the scientific track of the 7th Software Quality Days Conference SWQD 2015 held in Vienna, Austria, in January 2015. The SWQD conference offers a range of comprehensive and valuable information by presenting new ideas from the latest research papers, keynote speeches by renowned academics and industry leaders, professional lectures, exhibits, and tutorials. The four scientific full papers accepted for SWQD were each peer reviewed by three or more reviewers and selected out of 13 high quality submissions. Further, four short papers were also presented and are included in this book. The papers are organized into topical sections on risk management and inspection, change impact analysis, and systems testing and software and systems architectures. **Inventive**

Communication and Computational Technologies G. Ranganathan, Joy Chen, Álvaro Rocha, 2020-09-24 This book gathers selected papers presented at the 4th International Conference on Inventive Communication and Computational Technologies ICICCT 2020 held on 28-29 May 2020 at Gnanamani College of Technology, Tamil Nadu, India. The respective contributions highlight recent research efforts and advances in a new paradigm called ISMAC: IoT in Social, Mobile, Analytics, and Cloud.

contexts The topics covered include the Internet of Things Social Networks Mobile Communications Big Data Analytics Bio inspired Computing and Cloud Computing Given its scope the book is chiefly intended for academics and practitioners working to resolve practical issues in this area
