Meira Goldberg,2019-06-20 Transatlantic Malague as and Zapateados is an exploration of two fandango dances recording the circulations of people imagery music and dance across what were once the Spanish and Portuguese Empires Although these dance musics seem to be mirror images the unbreachable space between them reflects the political fault lines along which nineteenth century musical populism and folkloric nationalism extend into present day debates about globalization immigration neoliberalism and neofascism If malague as are a fantastic incarnation of Spanishness caught like a fly in amber by their anachronistic references to a fraught imperial past noisy and raucous zapateado dances cut toward the future Inherently marked by European conventions of zapatos shoes zapateados are nonetheless shaped by Africanist and Native American footwork traditions In these Afro Indigenous mestizajes not only are European aesthetic values reordered and resignified but the Catholic catechism which indoctrinated the New World yields to alternate spiritual systems springing out of a culture of resistance to European domination      **Music Library and Research Skills** Jane Gottlieb,2017 Concise and engaging this text covers a wide range of reference sources for research in all genres of music Through this practical introduction to the key concepts of music research students will develop a firm understanding of the tools used to gather data including what types of sources exist how they are arranged and how they may best be used to do research      *Music, Books on Music, and Sound Recordings* Library of Congress,1989      **The String Quartet, 1750-1797** Mara Parker,2017-07-05 The second half of the eighteenth century witnessed a flourishing of the string quartet often represented as a smooth and logical progression from first violin dominated homophony to a more equal conversation between the four voices Yet this progression was neither as smooth nor as linear as previously thought as Mara Parker illustrates in her examination of the string quartet during this period Looking at a wide variety of string quartets by composers such as Pleyel Distler and Filtz in addition to Haydn and Mozart the book proposes a new way of describing the relationships between the four instruments in different works Broadly speaking these relationships follow one of four patterns the lecture the polite conversation the debate and the conversation In focusing on these musical discourses it becomes apparent that each work is the product of its composer s stylistic choices location intended performers and intended audience Instead of evolving in a strict and universal sequence the string quartet in the latter half of the eighteenth century was a complex genre with composers mixing and matching musical discourses as circumstances and their own creative impulses required      Understanding Boccherini's Manuscripts Rudolf
