System Reliability and Security Javaid Iqbal, Faheem Syeed Masoodi, Ishfaq Ahmad Malik, Shozab Khurshid, Iqra Saraf, Alwi M. Bamhdi, 2023-12-07 Because of the growing reliance on software concerns are growing as to how reliable a system is before it is commissioned for use how high the level of reliability is in the system and how many vulnerabilities exist in the system before its operationalization Equally pressing issues include how to secure the system from internal and external security threats that may exist in the face of resident vulnerabilities These two problems are considered increasingly important because they necessitate the development of tools and techniques capable of analyzing dependability and security aspects of a system These concerns become more pronounced in the cases of safety critical and mission critical systems *System Reliability and Security Techniques and Methodologies* focuses on the use of soft computing techniques and analytical techniques in the modeling and analysis of dependable and secure systems It examines systems and applications having complex distributed or networked architectures in such fields as Nuclear energy Ground transportation systems Air traffic control Healthcare and medicine Communications *System reliability engineering* is a multidisciplinary field that uses computational methods for estimating or predicting the reliability aspects of a system and analyzing failure data obtained from real world projects *System security* is a related field that ensures that even a reliable system is secure against accidental or deliberate intrusions and is free of vulnerabilities This book covers tools and techniques cutting edge research topics and methodologies in the areas of system reliability and security It examines prediction models and methods as well as how to secure a system as it is being developed *Artificial intelligence and Machine Learning* Khalid S. Soliman, 2024-06-28 This book constitutes the revised selected papers of the 41st IBIMA International Conference on Artificial intelligence and Computer Science IBIMA AI 2023 which took place in Granada Spain during June 26 27 2023 The 30 full papers and 8 short papers included in this volume were carefully reviewed and selected from 58 submissions The book showcases a diverse array of research papers spanning various disciplines within the realm of Artificial Intelligence Machine Learning Information Systems Communications Technologies Software Engineering and Security and Privacy **Machine Learning Techniques for Smart City Applications: Trends and Solutions** D. Jude Hemanth, 2022-09-19 This book discusses the application of different machine learning techniques to the sub concepts of smart cities such as smart energy transportation waste management health infrastructure etc The focus of this book is to come up with innovative solutions in the above mentioned issues with the purpose of alleviating the pressing needs of human society This book includes content with practical examples which are easy to understand for readers It also covers a multi disciplinary field and consequently it benefits a wide readership including academics researchers and practitioners *The Doctor and the Algorithm* S. Scott Graham, 2022 The Doctor and the Algorithm weighs the imaginative promises of health AI against the real and unintended consequences that deep medicine can bring for patients providers and public health alike *The Digital Playbook* Dirk

Slama,Tanja Rückert,Sebastian Thrun,Ulrich Homann,Heiner Lasi,2023-07-31 This open access book is a practitioner s guide to smart connected products and solutions As a hands on playbook it combines the business and technical execution perspectives to help product companies OEMs manufacturers and equipment operators utilize the full potential of digital enablers especially Artificial Intelligence AI Internet of Things IoT and Digital Twins The Digital Playbook provides comprehensive and actionable guidance helping to address the challenges of creating sustainable and scalable digital business models managing cocreation and sourcing setting up the digital organization and handling the legal aspects For the technical execution perspective the playbook includes the AIoT Framework which explains how to combine data science and AI engineering with Digital Twins as well as software development for cloud and edge The integration with physical product development and retrofit integration of existing equipment is included as well A pragmatic agile approach is introduced that takes common agile inhibitors into consideration A holistic AIoT DevOps approach is described which combines key elements of DevOps for cloud edge and AI Enterprise readiness is ensured by looking at trust and security as well as reliability and resilience for AIoT A large number of real world examples and case studies help ensure practical relevance Readers should have a previous general understanding of digital strategies and technologies This book offers readers a clear understanding of the opportunities as well as the challenges related to building and operating smart connected products and solutions They are given a set of tools and blueprints which they can apply to their practical work in this space *Enterprise Internet of Things Handbook* Arvind Ravulavaru,2018-04-30 Get familiar with the building blocks of IoT solutions using off the shelf IoT platforms Key Features Work with various trending IoT platforms such as AWS IoT Azure IoT Google IoT IBM Watson IoT and Kaa IoT Gain hands on knowledge working with Cloud based IoT platforms IoT Analytics and so on A practical guide that will help you build IoT strategies for your organization Book Description There is a lot of work that is being done in the IoT domain and according to Forbes the global IoT market will grow from 157B in 2016 to 457B by 2020 This is an amazing market both in terms technology advancement as well as money In this book we will be covering five popular IoT platforms namely AWS IoT Microsoft Azure IoT Google IoT Core IBM Watson IoT and Kaa IoT middleware You are going to build solutions that will use a Raspberry Pi 3 a DHT11 Temperature and humidity sensor and a dashboard to visualize the sensor data in real time Furthermore you will also explore various components of each of the platforms that are needed to achieve the desired solution Besides building solutions you will look at how Machine Learning and IoT go hand in hand and later design a simple predictive web service based on this concept By the end of this book you will be in a position to implement an IoT strategy best fit for your organization What you will learn Connect a Temperature and Humidity sensor and see how these two can be managed from various platforms Explore the core components of AWS IoT such as AWS Kinesis and AWS IoT Rules Engine Build a simple analysis dashboard using Azure IoT and Power BI Understand the fundamentals of Google IoT and use Google core APIs to build your own dashboard Get started and work with the IBM Watson IoT platform Integrate

Cassandra and Zeppelin with Kaa IoT dashboard Review some Machine Learning and AI and get to know more about their implementation in the IoT domain Who this book is for This book is targeted at IoT architects and engineers or any stakeholders working with IoT solutions in an organization This book will also help decision makers and professionals from small and medium sized enterprises build an IoT strategy for their venture **Data-Driven Security** Jay Jacobs,Bob Rudis,2014-01-24 Uncover hidden patterns of data and respond with countermeasures Security professionals need all the tools at their disposal to increase their visibility in order to prevent security breaches and attacks This careful guide explores two of the most powerful data analysis and visualization You ll soon understand how to harness and wield data from collection and storage to management and analysis as well as visualization and presentation Using a hands on approach with real world examples this book shows you how to gather feedback measure the effectiveness of your security methods and make better decisions Everything in this book will have practical application for information security professionals Helps IT and security professionals understand and use data so they can thwart attacks and understand and visualize vulnerabilities in their networks Includes more than a dozen real world examples and hands on exercises that demonstrate how to analyze security data and intelligence and translate that information into visualizations that make plain how to prevent attacks Covers topics such as how to acquire and prepare security data use simple statistical methods to detect malware predict rogue behavior correlate security events and more Written by a team of well known experts in the field of security and data analysis Lock down your networks prevent hacks and thwart malware by improving visibility into the environment all through the power of data and Security Using Data Analysis Visualization and Dashboards Smart Cities and Machine Learning in Urban Health Thomas, J. Joshua, Geropanta, Vasiliki, Karagianni, Anna, Panchenko, Vladimir, Vasant, Pandian, 2021-11-12 The perception of smart cities encompasses a strategy that uses different types of technologies artificial intelligence AI and machine learning and in which through the internet of things IoT and sensor based data collection the strategy extrapolates information using insights gained from that data to manage or monitor or track assets resources and services efficiently in an urban area Both these models deeply affect the localities where they are applied and can create together immense possibilities for urban recovery better quality of life physical and mental health protection and economic and social redevelopment Smart Cities and Machine Learning in Urban Health promotes interdisciplinary work that develops and illustrates the concept of resilience in relation to smart city and machine learning The book examines the ability of an area and its communities to recover quickly from difficulties the rigidity and resistance of an area and its communities to possible crisis the ability of an area its communities infrastructure and business to spring back into shape and the responsiveness and mitigation towards the crisis with a special look at the impact of the COVID 19 pandemic The research s theoretical foundation rests on a wide range of non architectural sources primarily AI sociology urban studies and technological development but it explores everything on cases taken from real cities thus transforming them into pieces of

architectural interest Covering topics such as carbon emissions digital healthcare systems and urban transformation this book is an essential resource for graduate and post graduate students policymakers researchers university faculty engineers public management hospital administration professors and academicians

Data Driven Karen Levy, 2024-06-18 A behind the scenes look at how digital surveillance is affecting the trucking way of life Long haul truckers are the backbone of the American economy transporting goods under grueling conditions and immense economic pressure Truckers have long valued the day to day independence of their work sharing a strong occupational identity rooted in a tradition of autonomy Yet these workers increasingly find themselves under many watchful eyes Data Driven examines how digital surveillance is upending life and work on the open road and raises crucial questions about the role of data collection in broader systems of social control Karen Levy takes readers inside a world few ever see painting a bracing portrait of one of the last great American frontiers Federal regulations now require truckers to buy and install digital monitors that capture data about their locations and behaviors Intended to address the pervasive problem of trucker fatigue by regulating the number of hours driven each day these devices support additional surveillance by trucking firms and other companies Traveling from industry trade shows to law offices and truck stop bars Levy reveals how these invasive technologies are reconfiguring industry relationships and providing new tools for managerial and legal control and how truckers are challenging and resisting them Data Driven contributes to an emerging conversation about how technology affects our work institutions and personal lives and helps to guide our thinking about how to protect public interests and safeguard human dignity in the digital age

Evolving Software Systems Tom Mens, Alexander Serebrenik, Anthony Cleve, 2014-01-08 During the last few years software evolution research has explored new domains such as the study of socio technical aspects and collaboration between different individuals contributing to a software system the use of search based techniques and meta heuristics the mining of unstructured software repositories the evolution of software requirements and the dynamic adaptation of software systems at runtime Also more and more attention is being paid to the evolution of collections of inter related and inter dependent software projects be it in the form of web systems software product families software ecosystems or systems of systems With this book the editors present insightful contributions on these and other domains currently being intensively explored written by renowned researchers in the respective fields of software evolution Each chapter presents the state of the art in a particular topic as well as the current research available tool support and remaining challenges The book is complemented by a glossary of important terms used in the community a reference list of nearly 1 000 papers and books and tips on additional resources that may be useful to the reader reference books journals standards and major scientific events in the domain of software evolution and datasets This book is intended for all those interested in software engineering and more particularly software maintenance and evolution Researchers and software practitioners alike will find in the contributed chapters an overview of the most recent findings covering a broad spectrum of software evolution topics In addition it can

also serve as the basis of graduate or postgraduate courses on e.g. software evolution requirements engineering model driven software development or social informatics

Optical Spectroscopy And Imaging For Cancer Diagnostics: Fundamentals, Progress, And Challenges Nouredine Melikechi, 2023-01-06 This is an interdisciplinary book that presents the applications of novel laser spectroscopy and imaging techniques for the detection of cancers recently developed by some of the world's most renowned researchers. The book consists of three parts and a total of 16 chapters. Each chapter is written by leading experts who are actively seeking to develop novel spectroscopic and analytical methods for cancer detection and diagnosis. In Part I the authors present fundamentals on optics atoms and molecules biophysics cancer and machine learning. These chapters are intended for those who are not experts in the field but wish to learn about fundamental aspects of some of the key topics that are addressed in this book. Particular attention has been given to providing key references for those who wish to go further into the fundamental aspects of atoms and molecules light matter interaction optical instrumentation machine learning and cancer. In Part II the authors present key applications of various laser spectroscopic methods in cancer diagnosis. They have provided recent progress in cancer diagnostics obtained by combining laser spectroscopy and machine learning for the analysis of the spectra acquired from biomedical tissues and biofluids. In Part III the authors present chapters that discuss key developments in the applications of various laser imaging techniques for cancer detection. This is one of the few books that addresses cancer detection and diagnosis using laser spectroscopic and imaging tools with an eye on providing the reader the scientific tools including machine learning ones.

5G Enabled Technology for Smart City and Urbanization System Susheela Hooda, Vidhu Kiran, Rupali Gill, Durgesh Srivastava, Jabbar H. Yousif, 2024-12-04 This book examines the applications trends and challenges of 5G Enabled technologies for Smart City and Urbanization systems. It addresses the challenges to bringing such capabilities of 5G enabled technologies for smart cities and urbanisation into practice by presenting the theoretical as well as technical research outcomes with case studies. It covers key areas including smart building smart health care smart mobility smart living smart surveillance and IOT based systems. It explains how these systems are connected using different technologies that support 5G access and control protocols. Offers a comprehensive understanding of the emergence of 5G technology and its integration with IoT Big Data and Artificial Intelligence for smart city and urbanisation. Focuses on useful applications of Smart City and Urbanization which can enhance different aspects of urban life. Explores the advantages of using massive IoT and predictive analytics approaches in smart cities. IoT Bigdata Deep learning and machine learning techniques are explained to fuel smart city and Urbanization system. Addresses both theoretical and technical research outcomes related to smart city and

urbanisation with 5G technology It serves as a valuable reference for graduate students researchers and m practitioners seeking to deepen their knowledge and engage with the latest advancements in the areas of Smart cities and Urbanization systems

Practical Data Analytics for Innovation in Medicine Gary D. Miner,Linda A. Miner,Scott Burk,Mitchell Goldstein,Robert Nisbet,Nephi Walton,Thomas Hill,2023-02-08 Practical Data Analytics for Innovation in Medicine Building Real Predictive and Prescriptive Models in Personalized Healthcare and Medical Research Using AI ML and Related Technologies Second Edition discusses the needs of healthcare and medicine in the 21st century explaining how data analytics play an important and revolutionary role With healthcare effectiveness and economics facing growing challenges there is a rapidly emerging movement to fortify medical treatment and administration by tapping the predictive power of big data such as predictive analytics which can bolster patient care reduce costs and deliver greater efficiencies across a wide range of operational functions Sections bring a historical perspective highlight the importance of using predictive analytics to help solve health crisis such as the COVID 19 pandemic provide access to practical step by step tutorials and case studies online and use exercises based on real world examples of successful predictive and prescriptive tools and systems The final part of the book focuses on specific technical operations related to quality cost effective medical and nursing care delivery and administration brought by practical predictive analytics Brings a historical perspective in medical care to discuss both the current status of health care delivery worldwide and the importance of using modern predictive analytics to help solve the health care crisis Provides online tutorials on several predictive analytics systems to help readers apply their knowledge on today s medical issues and basic research Teaches how to develop effective predictive analytic research and to create decisioning prescriptive analytic systems to make medical decisions quicker and more accurate

Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license
