European Tax Harmonization Enrique G. Mendoza, 2001 The theory of international macroeconomics shows that domestic
tax policy in a global economy affects foreign economic conditions via complex dynamic interactions through relative prices
tax revenues and wealth distribution This paper proposes a tractable quantitative framework for assessing tax policies that is
consistent with this theory The significance of the international transmission channels of tax policy is evaluated in the context
of a workhorse two country dynamic general equilibrium model The model is used to assess the potential effects of the
European harmonization of capital income taxes The results show that this policy if enacted along the lines followed in
harmonizing value added taxes yields large capital outflows and a significant erosion of tax revenue for Continental Europe
while the opposite effects benefit the United Kingdom Welfare in the United Kingdom rises as result while Continental
Europe may incur a substantial welfare cost Macroeconomic Analysis Bruce Gensemer, Edward Shapiro, 1970 *Labor*
Economics in an Islamic Framework Toseef Azid, Umar Burki, Muhammad Junaid Khawaja, Nasim Shah Shirazi, Muhammad
Tahir, 2021-12-30 The labor market in Islam is governed by the Islamic laws of fairness justice and reward that is equivalent
to the job done Most of the literature in the field discusses the normative aspect of the labor market whereas few attempts
can be seen to address more positive aspects There is a need for new theoretical and empirical models for the Islamic labor
market which should differ from established approaches This book provides a comprehensive overview of the nature scope
and dimensions of the labor market in an Islamic context from both theoretical and practical perspectives It presents and
discusses labor economics and then compares the similarities and differences between conventional and Islamic views of the
labor market explaining where they meet and critically justifying why they differ under the umbrella of Shari ah The book
raises pertinent issues which it analyzes from both standpoints and widens the discourse to include norms morality and
related institutions such as social security and welfare A unique feature of the book is that it examines labor economics
practices among a specific group of countries and studies the labor conditions within these countries where the majority of
the population follow the teachings of Islam in their daily lives The book proposes practical strategies for the development of
new models for the Islamic labor market which are compatible with the modern world The book will enable academics and
practitioners of Islamic economics to make economic sense of Shari ah compliance and human resource development

Strategic Extremism Edward L. Glaeser, Giacomo A. M. Ponzetto, Jesse M. Shapiro, 2004 Party platforms differ sharply from one another especially on issues with religious content such as abortion or gay marriage Religious extremism in the U S appears to be strategically targeted to win elections since party platforms diverge significantly while policy outcomes like abortion rates are not affected by changes in the governing party Given the high returns from attracting the median voter why do vote maximizing politicians veer off into extremism In this paper we find that strategic extremism depends on an important intensive margin where politicians want to induce their core constituents to vote or make donations and the ability to target political messages towards those core constituents Our model predicts that the political relevance of religious issues is highest when around one half of the voting population attends church regularly Using data from across the world and within the U S we indeed find a non monotonic relationship between religious extremism and religious attendance
