Stengel, 2011-06-30 If you have good economic principles then more than likely you are making good business decisions. It also discusses economic motivations for expanding a business and contributions from economics for improved organization of large firms as well as market price, quantity, equilibrium, competitive behavior and the role of market structure on market equilibrium and competition. It concludes by considering market regulation in terms of the generic problems that create the need for regulation and possible remedies for those problems.
