Innovation and Sustainability in Governments and Companies: A Perspective to the New Realities Ernesto Leon-Castro, Manoj Sahni, Fabio Blanco-Mesa, Victor Alfaro-Garcia, Jose Merigo, 2023-12-14 Innovation and sustainability are issues that have become very relevant in recent years. This book presents a compilation of investigations on these topics divided into those applied in government or enterprises. The objective is to demonstrate to the audience how these issues have been worked around the world and in different scenarios. Among the papers, there are works related to economic variables, imports, exports, and analysis in different sectors such as tourism, agriculture, education, and even in countries in general.

The Truth about Economics Michael Ryan, 2017-12-06 This book presents a fascinating story about how academia got it all wrong. Was it an academic conspiracy? Was it peculiar social pressures in academia? Regardless of how it all came about, it is time to teach our children financial literacy instead of economics. Financial literacy is a course that prepares our children for success in today's economic society. Typical economics courses do nothing to prepare your child for understanding day-to-day economic responsibility. This book presents the reasons to join the battle. It is time to stand up and demand relevant education from your state education system.

Political Economy for Human Rights Manuel Couret Branco, 2019-06-05 Over time, there has been a miscommunication between mainstream economics and human rights that has paved the way to a justificatory ideology that validates the submission of human rights to the logic of market capitalism. This book shows how the discourse of mainstream economics is intrinsically opposed to the strengthening of human rights and outlines the principles upon which a human rights-based political economy can be built. Considering a variety of recognized human rights such as the right to water and sanitation, the right to social security, the right to work, cultural freedom, and democracy, this book describes how mainstream economics theory conflicts with these rights and explores alternative modes of thinking that incorporate human rights concerns into economics. Moreover, the book also reflects on the teaching of political economy for human rights. It sets out that a political economy favourable to human rights must be pluralist, interdisciplinary, participatory, de-commodified, non-utilitarian, and non-consequentialist. The author proposes that it must not only assume the performative character of economics but also and especially its transformative purpose. Political Economy for Human Rights will offer students, academics, activists, and policy makers useful tools to understand some of the main contradictions of contemporary societies and new paths leading to a more just and fraternal world. It will also be of great interest to the general public concerned with human rights and economic issues.
