Perez Gomez Architecture Crisis:

Architecture and the Crisis of Modern Science Alberto Pérez Gómez, 1983 **Attunement** Alberto Perez-Gomez, 2016-07-22 How architecture can move beyond the contemporary enthusiasms for the technically sustainable and the formally dazzling to enhance our human values and capacities Architecture remains in crisis its social relevance lost between the two poles of formal innovation and technical sustainability In *Attunement* Alberto Perez Gomez calls for an architecture that can enhance our human values and capacities an architecture that is connected attuned to its location and its inhabitants Architecture Perez Gomez explains operates as a communicative setting for societies its beauty and its meaning lie in its connection to human health and self understanding Our physical places are of utmost importance for our well being Drawing on recent work in embodied cognition Perez Gomez argues that the environment including the built environment matters not only as a material ecology but because it is nothing less than a constituent part of our consciousness To be fully self aware we need an external environment replete with meanings and emotions Perez Gomez views architecture through the lens of mood and atmosphere linking these ideas to the key German concept of Stimmung attunement and its roots in Pythagorean harmony and Vitruvian temperance or proportion He considers the primacy of place over space the linguistic aspect of architecture the voices of architecture and the voice of the architect architecture as a multisensory not pictorial experience with Piranesi Ledoux and Hejduk as examples of metaphorical modeling and how Stimmung might be put to work today to realize the contemporary possibilities of attunement **Architectural Principles in the Age of Cybernetics** Christopher Hight, 2007-12-12 A theoretical history of anthropomorphism and proportion in modern architecture this volume brings into focus the discourse around proportion with current problems of post humanism in architecture alongside the new possibilities made available through digital technologies The book examines how the body and its ordering has served as a central site of architectural discourse in recent decades especially in attempts to reformulate architecture's relationship to humanism modernism and technology Challenging some concepts and categories of architectural history and situates current debates within a broader cultural and technological context Hight makes complex ideas easily accessible Extensively illustrated and written without academic jargon for an informed but non specialized architectural audience this book elucidates the often obscure debates of avant garde architectural discourse and design while demonstrating how these debates have affected everyday places and concepts of architecture As a result it will appeal to professional architects academics and students combining as it does an insightful introduction to the fundamental issues of architectural history and theory over the past fifty years with entirely new formulations of what that history is and means **Architecture and the Crisis of Modern Science** Alberto Pérez Gómez, 1983 **Space Syntax** Laura Vaughan, John Peponis, Ruth Conroy Dalton, 2025-04-30 Professor Bill Hillier spent most of his career at The Bartlett University College London where he founded and developed with a team of colleagues an original research programme that set the study of architecture on a firm

scientific basis His transformational way of thinking about buildings and cities influenced generations of scholars researchers and practitioners within the built environment disciplines and way beyond in fields ranging from archaeology and biology to physics and zoology Space Syntax Selected papers by Bill Hillier provides a canon of works that reflects the progression of Hillier's ideas from the early publications of the 1970s to his most recent work published before his death in 2019 This selection of influential works ranges from his papers on architecture as a professional and research discipline through to his later papers that present a theory of the spatial structure of the city and its social functions By bringing together writing from across his career span of half a century with specially commissioned introductions by a wide range of international experts in the field we are able to contextualise and show the range and evolution of Hillier's key ideas

Expanding Fields of Architectural Discourse and Practice Matthew Butcher, Megan O'Shea, 2020-11-27 Expanding Fields of Architectural Discourse and Practice presents a selection of essays architectural experiments and works that explore the diversity within the fields of contemporary architectural practice and discourse Specific in this selection is the question of how and why architecture can and should manifest in a critical and reflective capacity as well as to examine how the discipline currently resonates with contemporary art practice It does so by reflecting on the first 10 years of the architectural journal P E A R 2009 to 2019 The volume argues that the initial aims of the journal to explore and celebrate the myriad forms through which architecture can exist are now more relevant than ever to contemporary architectural discourse and practice Included in the volume are architectural practitioners design researchers artists architectural theorists historians journalists curators and a paleobiologist all of whom contributed to the first seven issues of the journal Here they provide a unique presentation of architectural discourse and practice that seeks to test new ground while forming distinct relationships to recent and more longstanding historical legacies Praise for Expanding Fields of Architectural Discourse and Practice The story told by the authors of this work can thus be considered as the central tool of an architectural transgression Critique d art

Architecture's Appeal Marc J. Neveu, Negin Djavaherian, 2015-02-11 This collection of previously unpublished essays from a diverse range of well known scholars and architects builds on the architectural tradition of phenomenological hermeneutics as developed by Dalibor Vesely and Joseph Rykwert and carried on by David Leatherbarrow Peter Carl and Alberto Perez Gomez Taking an interdisciplinary approach and drawing on ideas from beyond the architectural canon contributors including Kenneth Frampton David Leatherbarrow Juhani Pallasmaa Karsten Harries Steven Holl Indra Kagis McEwen Paul Emmons and Louise Pelletier offer new insights and perspectives on questions such as the following Given the recent fascination with all things digital and novel what is the role of history and theory in contemporary architectural praxis Is authentic meaning possible in a technological environment that is so global and interconnected What is the nature and role of the architect in our shared modern world How can these questions inform a new model of architectural praxis Architecture's Appeal is a thought provoking book which will inspire further scholarly inquiry and act as a basis for discussion in the wider

field as well as graduate seminars in architectural theory and history **Digital Poetics** Dr Marjan Colletti, 2013-12-31 Digital Poetics celebrates the architectural design exuberance made possible by new digital modelling techniques and fabrication technologies By presenting an unconventional and original humanistic theory of CAD computer aided design the author suggests that beyond the generation of innovative engineering forms digital design has the potential to affect the wider complex cultural landscape of today in profound ways The book is linked to a website which contains a larger selection of images of some featured projects **Construction Site for Possible Worlds** Amanda Beech, Robin Mackay, James Wiltgen, 2020-08-11 Perspectives from philosophy aesthetics and art on how to envisage the construction site of possible worlds Given the highly coercive and heavily surveilled dynamics of the present moment when the tremendous pressures exerted by capital on contemporary life produces an aggressively normative official reality the question of the construction of other possible worlds is crucial and perhaps more urgent than ever This collection brings together different perspectives from the fields of philosophy aesthetics and art to discuss the mechanisms through which possible worlds are thought constructed and instantiated forcefully seeking to overcome the contemporary moment's deficit of conceptualizing alternate realities its apparent fear of imagining possible new and compelling futures to begin the arduous task of producing the political dynamics necessary for actual construction Implicit in this dynamic between the imaginary and the possible is the question of how thinking intertwines with both rationality and the inherited contingencies and structures of the world With no ascertainable ground on which to build with no confidence in any given that could guarantee our labors how do we even envisage the construction site's of possible worlds and with what kind of diagrams tools and languages can we bring them into being **Theory in Landscape Architecture** Simon R. Swaffield, 2002-11-22 Basic theoretical texts for landscape architects **Precision in Architecture** Mhairi McVicar, 2019-05-13 This book offers a detailed insight into the desire for and consequences of precise communications in the daily life of contemporary architectural practice through close readings of constructed architectural details by Sigurd Lewerentz Caruso St John Architects Mies van der Rohe and OMA In the professionalised context of the contemporary architectural profession precise communications drawings specifications letters faxes and emails are charged with the complex task of translating architectural intent into a neutral and quantifiable language which is expected to guarantee an exact match between the architects intentions and the constructed result Yet as any architectural practitioner will know it is doubtful whether the construction of any architectural project may ever exactly match all written and drawn predictions This book challenges claims to certainty which have been attributed to such communications from the mid nineteenth century onwards and critiques ongoing expectations of certainty in contemporary architectural production **Charles-Etienne Briseux's Musical Analogy and the Limits of Instrumentality in Architecture** Alberto Pérez Gómez, 1999 Modernity and Its Other Gevork Hartoonian, 1997 Also included is a review of the thematics of the culture of building and an assessment of the relationship between architecture and the city **The**
