National Cyber Summit (NCS) Research Track Kim-Kwang Raymond Choo, Thomas H. Morris, Gilbert L.

Peterson, 2019-09-24 These proceedings gather papers presented at the Cyber Security Education Stream and Cyber Security Technology Stream of The National Cyber Summit's Research Track and report on the latest advances in areas ranging from software security to cyber attack detection and modeling the use of machine learning in cyber security legislation and policy surveying small businesses cyber competition and so on Understanding the latest capabilities in cyber security is the best way to prepare users and organizations for potential negative events Consequently this book will be of interest to cyber security researchers educators and practitioners as well as students who want to learn about cyber security The Drone Age Michael J. Boyle, 2020 Over the last decade the rapid pace of innovation with drone technology has led to dozens of new and innovative commercial and scientific applications from Amazon drone deliveries to the patrolling of national parks with drones But what is less understood is how the spread of unmanned technology will change the patterns of war and peace in the future Will the use of drones produce a more stable world or will it lead to more conflict Will drones gradually replace humans on the battlefield or will they empower soldiers to act more precisely and humanely in crisis situations How will drones change surveillance around the world and at home The Drone Age traces the rise of unmanned technology and how it is reshaping our world The spread of drones is reordering geopolitical fault lines and providing new ways for states to test the nerves and strategic commitments of their rivals Drones are also allowing terrorist groups like the Islamic State to take to the skies and to level the playing field against their enemies Across the world the low financial cost of drones and the reduced risks faced by pilots is making drone technology an essential tool for militaries peacekeeping forces and even private companies From large surveillance drones to insect like micro drones unmanned technology is revolutionizing the way that states and non state actors compete with each other and is providing game changing benefits to those who can most rapidly adapt unmanned technology to their own purposes Yet peacekeeping and humanitarian organizations are also utilizing drones too An essential guide to a surprisingly complex disruptive force in world politics The Drone Age shows how the mastery of drone technology will become central to the ways that governments and non state actors seek power and influence in the coming decades **Global Innovation Management** J. Law and Technology Nanci K. Carr, 2024-09-26 Technology is an important part of our everyday lives Whether we ask Alexa to start the coffee machine or check our phones for the traffic report we increasingly interact with technology As much as we may enjoy and rely upon technology it is not without its challenges including the inability of the law to keep pace with technological developments and the ethical issues that arise For example tort law is impacted by technology the proliferation of drones requires a new look at the law of trespass and video Zoom meetings can impose direct liability on employers for example Social media supports an increasing share of all advertising and endorsements and is subject to regulation of which influencers are often not aware Global advertising expenditures on various internet and social media platforms also drives the need for a change in right of publicity law In the United States the right of publicity is governed by state rather than federal law so there is no uniform approach One part of the book includes a survey of the law of each US state and proposes a new federal statute Although most of the examples are drawn from the US the issues raised are fully international in scope and relevance This book will appeal to legal practitioners trying to manage new technology issues facing their clients academics teaching students how the law is changing and needs to continue to change as technology develops and teachers and researchers in business and management schools needing to address technology and governance issues
