FIELD MEDICAL SERVICE TECHNICIAN STUDENT HANDBOOK VERSION 4.1 With Block 1 & 2 Student Outlines And Visual Presentations , Over 2 300 total pages

OVERVIEW Tactical Combat Casualty Care TCCC was developed to emphasize the need for continued improvement in combat pre hospital care The Committee on Tactical Combat Casualty Care CoTCCC was established in 2001 and is part of the Defense Health Board CoTCCC is a standing multi service committee charged with monitoring medical developments in regards to practice technology pharmacology and doctrine New concepts in hemorrhage control airway management fluid resuscitation analgesia antibiotics and other lifesaving techniques are important steps in providing the best possible care for our Marines and Sailors in combat The TCCC guidelines are published every 4 years in the Prehospital Trauma Life Support manual It has been recognized that TCCC guidelines and curriculum will need to change more often than the 4 year cycle of the PHTLS textbook publication The National Association of Emergency Medical Technicians NAEMT will include the updated TCCC guidelines and curriculum on its website as they are approved as a way to help get this new information out to the combat medical personnel in the military that need it

PRINCIPLES OF TACTICAL COMBAT CASUALTY CARE TCCC The principles of Tactical Combat Casualty Care are fundamentally different from those of traditional civilian trauma care where most medical providers and medics train These differences are based on both the unique patterns and types of wounds that are suffered in combat and the tactical conditions medical personnel face in combat Unique combat wounds and tactical conditions make it difficult to determine which intervention to perform at what time Besides addressing a casualty s medical condition responding medical personnel must also address the tactical problems faced while providing care in combat A medically correct intervention at the wrong time may lead to further casualties Put another way good medicine may be a bad tactical decision which can get the rescuer and the casualty killed To successfully navigate these issues medical providers must have skills and training oriented to combat trauma care as opposed to civilian trauma care The specifics of casualty care in the tactical setting will depend on the tactical situation the injuries sustained by the casualty the knowledge and skills of the first responder and the medical equipment at hand In contrast to a hospital Emergency Department setting where the patient IS the mission on the battlefield care of casualties sustained is only PART of the mission TCCC recognizes this fact and structures its guidelines to accomplish three primary goals

- 1 Treat the casualty
- 2 Prevent additional casualties
- 3 Complete the mission

In thinking about the management of combat casualties it is helpful to divide care into three distinct phases each with its own characteristics and limitations

Moore, David V. Feliciano, Kenneth L. Mattox, 2017-12-08 The world's leading resource on trauma surgery with an expanded full color atlas A Doody's Core Title for 2017 Hailed by readers and reviewers for its expert authorship and high yield clinical content Trauma is unquestionably the field's definitive text Enhanced by a full color design and a high quality atlas of anatomic drawings and surgical approaches this trusted classic takes readers through the full range of injuries the trauma surgeon is likely to encounter Supported by numerous x rays CT

scans plus tables throughout Trauma begins with an informative look at kinematics and the mechanisms of trauma injury. Subsequent chapters provide useful background information on the epidemiology of trauma injury, prevention, the basics of trauma systems, triage and transport, and much more. The next section meticulously reviews generalized approaches to the trauma patient from pre-hospital care and managing shock to emergency department thoracotomy and the management of infections. Trauma then delivers a clear organ-by-organ survey of treatment protocols designed to help clinicians respond to any critical care situation with confidence, no matter what body system is involved. The remaining sections of the book will help readers successfully handle specific challenges in trauma, including alcohol and drug abuse and combat-related wounds, in addition to post-traumatic complications such as multiple organ failure. Media download with high quality procedural videos. Increased number of algorithms and illustrations. More international authors. Expanded Trauma Atlas contains precise full-color anatomical illustrations and proven surgical techniques. High yield section on specific approaches to the trauma patient prepares readers for the complete spectrum of cases in trauma critical surgery care they will face in real world practice. A to Z overview of the management of specific traumatic injuries. Detailed discussion of the management of complications.

[PHTLS:Trauma First Response](#) Naemt, American College of Surgeons. Committee on Trauma, 2016-05-11. As the required textbook for NAEMT's Trauma First Response course, PHTLS Trauma First Response delivers comprehensive evidence-based guidelines culled from NAEMT's internationally renowned Prehospital Trauma Life Support 7th Edition text to help you provide the most effective pre-EMS trauma treatment. It's the perfect book for first responders, police officers, firefighters, rescue personnel, and safety officers.

Geriatric Trauma and Critical Care Fred A. Luchette, Jay A. Yelon, 2017-07-30. With the expertise of an author panel of leading clinicians in the field of surgery, trauma, critical care, and geriatrics, the new edition of this text addresses the explosion in knowledge on the impact aging has on injury, acute illness, and critical care management. The text covers the physiologic changes associated with aging, as well as the clinical assessment, stratification, and management of acute illness and injury. Furthermore, the new edition discusses the full spectrum of critical care management of the elderly. Part I explores the impact of aging on health and the healthcare system. There will be detailed discussion on the physiologic effects of aging and the impact on clinical management. The management of common surgical emergencies in the elderly is addressed in Part II. Part III addresses the evaluation and management of trauma and injury. Finally, Part IV explores the specific challenges of critical care management, including end-of-life and ethics in the geriatric population. Updated information reflective of the expansive literature is addressed in all sections. New to the second edition are chapters on prehospital care, burns, nursing concerns, and abdominal solid organ injury. Appropriate chapters will include case vignettes and clinical algorithms. All chapters include a bullet point summary. Geriatric Trauma and Critical Care 2nd Edition will be of great value to trauma surgeons, acute care surgeons, critical care specialists, emergency medicine physicians, geriatricians, general surgeons, and trainees in surgery, critical care, and emergency medicine. Advanced
