

Physical Science Crossword Puzzle Project

Across

3. is the resistance of any physical object to any change in its state of motion.
 7. is the rate at which an object covers distance.
 10. transfer occurs by three mechanisms: conduction, convection, and radiation.
 11. is the base unit for length or distance.
 14. the amount of work (or energy transferred) in a certain amount of time.
 16. speed and direction of an object.
 17. transfer of energy that occurs when a force makes an object move.
 19. is the variable that is changed or controlled in a scientific experiment.
 20. a material or an object that does not easily allow heat, electricity, light, or sound to pass through it.
 21. is the metric unit base for temperature.

Down

1. the amount of heat needed to raise the temperature of one gram of a substance by one degree Celsius, or to raise the temperature of one pound of a substance by one degree Fahrenheit.
 2. a unit of mass equal to 1000 grams.
 4. is an idea or explanation that you then test through study and experimentation.
 5. a measure of the warmth or coldness of an object or substance with reference to some standard value.
 6. are the variables that the experimenter changes to test their dependent variable.

8. the process in which energy is emitted as particles or waves.
 9. can be transferred from one object to another in the form of heat.
 12. heat transferred in a gas or liquid by the circulation of currents from one region to another.
 13. the amount of energy exerted when a force of one newton is applied over a displacement of one meter.
 15. energy that is transferred by the movement of electrons or ions.
 18. something that causes a change in the motion of an object. (an object's mass multiplied by its acceleration)

Tillery,Tillery Bill,2004-01-09 **Power Practice: Science, Gr. 1-2, eBook** Marilyn Marks,2005-02-01 **Science Puzzlers** Nancy De Waard,Jack De Waard,2007-04 This revised edition offers 200 puzzles for home or school Learn science terms build a solid science foundation and exercise your higher level thinking skills with these fun to do and often challenging science puzzles This book covers life science earth science physical science and the human body Answers are provided Microscopy Gr. 5-8 , *Resources in Education* ,1995 Motion Gr. 4-7 Kris Graupe,2001-01-01 Students get cool notions all about motion Our highly informative and simple to use unit teaches students all about motion from linear motion to oscillating motion to reciprocating motion to rotational motion Students participate in meaningful activities associated with the core theme of each lesson which are followed by related student notes This format helps to stress process rather than concentrating on the memorization of factual information Students will move through this material like it was nothing This Physical Science lesson provides a teacher and student section with a variety of reading passages activities crossword word search pictograms and answer key to create a well rounded lesson plan **Physics for the Inquiring Mind** Eric M. Rogers,2011-04-17 In our scientific age an understanding of physics is part of a liberal education Lawyers bankers governors business heads administrators all wise educated people need a lasting understanding of physics so that they can enjoy those contacts with science and scientists that are part of our civilization both materially and intellectually They need knowledge and understanding instead of the feelings all too common that physics is dark and mysterious and that physicists are a strange people with incomprehensible interests Such a sense of understanding science and scientists can be gained neither from sermons on the beauty of science nor from the rigorous courses that colleges have offered for generations when the headache clears away it leaves little but a confused sense of mystery Nor is the need met by survey courses that offer a smorgasbord of tidbit they give science a bad name as a compendium of information or formulas The non scientist needs a course of study that enables him to learn real science and make its own with delight For lasting benefits the intelligent non scientist needs a course of study that enables him to learn genuine science carefully and then encourages him to think about it and use it He needs a carefully selected framework of topics not so many that learning becomes superficial and hurried not so few that he misses the connected nature of scientific work and thinking He must see how scientific knowledge is built up by building some scientific knowledge of his own by reading and discussing and if possible by doing experiments himself He

must think his own way through some scientific arguments He must form his own opinion with guidance concerning the parts played by experiment and theory and he must be shown how to develop a taste for good theory He must see several varieties of scientific method at work And above all he must think about science for himself and enjoy that These are the things that this book encourages readers to gain by their own study and thinking Physics for the Inquiring Mind is a book for the inquiring mind of students in college and for other readers who want to grow in scientific wisdom who want to know what physics really is
