new spectrum of sharing both in the individual and business settings. Alongside this new spectrum is a new disruptive business model known as the platform business model. While the subject continues to attract interest globally and locally, there is a need to deepen the understanding of this subject to validate global perspectives on platforms as economic drivers within the African context. *Africa's Platforms and the Evolving Sharing Economy* is an essential reference source that explores evidence-based platform dynamics and their impact on Africa as a continent leveraging technology for economic development. The book also delves into current data protection and privacy issues and the policies and regulations that could impact the design, deployment, and use of platforms for businesses. Featuring research on topics such as digital design, e-commerce, and enterprise information systems, this book is ideally designed for government officials, economists, business executives, managers, academicians, students, researchers, and global finance professionals. *Advances in Management Research* Avinash K. Shrivastava, Sudhir Rana, Amiya Kumar Mohapatra, Mangey Ram, 2019-11-18. This book covers advancements across business domains in knowledge and information management. It presents research trends in the fields of management innovation and technology and is composed of research papers that show applications of IT analytics and business operations in industry and in educational institutions. It offers a combination of scientific research methods and concepts with contributions from globally renowned authors, presents various management domains from a number of countries for a global perspective, and provides a unique combination of topics and methods while giving insights on the management domain using a holistic approach. The book provides scholars with a platform to derive maximum utility in the area of management research and technology by subscribing to the idea of managing business through performance and management technology.

Contracting and Contract Law in the Age of Artificial Intelligence Martin Ebers, Cristina Poncibò, Mimi Zou, 2022-06-30. This book provides original, diverse, and timely insights into the nature, scope, and implications of Artificial Intelligence (AI), especially machine learning and natural language processing, in relation to contracting practices and contract law. The chapters feature unique, critical, and in-depth analysis of a range of topical issues, including how the use of AI in contracting affects key principles of contract law, from formation to remedies, the implications for autonomy, consent, and information asymmetries in contracting, and how AI is shaping contracting practices and the laws relating to specific types of contracts and sectors. The contributors represent an interdisciplinary team of lawyers, computer scientists, economists, political scientists, and linguists from academia, legal practice, policy, and the technology sector. The chapters not only engage with salient theories from different disciplines but also examine current and potential real-world applications and implications of AI in contracting and explore feasible legal policy and technological responses to address the challenges presented by AI in this field. The book covers major common and civil law jurisdictions, including the EU, Italy, Germany, UK, US, and China. It should be read by anyone interested in the complex and fast-evolving relationship between AI, contract law, and related areas of law, such as business, commercial, consumer, competition, and data protection laws. *Collaborative Value*
