and Employers in Service Organizations Arvind K. Birdie,2017-04-21 With the increasing globalization and fast paced technological advances in business today service organizations must to respond to the changing business dynamic between employers and employees The service industry has metamorphosed into a revolution not only in United States but in developed and developing countries also Highly industrialized countries have become service economies at least when measured in terms of share of the workforce employed in service industries This new book Employees and Employers in

Service Organizations Emerging Challenges and Opportunities the first volume in the 21st Century Business Management book series provides an in depth exploration of recent concepts and trends in business management in the service industries It looks at the changing expectations and loyalties of young workers and others and the challenges and opportunities presented for service employers The book considers theory and research findings providing a plethora of practical implications and applications for these new workplace behavior dynamics Exploring the different perspectives and concepts from the book s researchers and authors Employees and Employers in Service Organizations Emerging Challenges and Opportunities cover themes such as work life balance spirituality in the workplace emerging positive psychology concepts such as psychological capital knowledge management and mindfulness expectations motivation and behavior of different generations such as Generation Y This informative volume will be valuable for faculty teaching courses in management and self improvement for leaders and executives as well as for those in service industries Positive Psychology Studies in Education Abdolvahab Samavi,Lourdes Rey,Hassan Khezri,Beatrice Ifeoma Ajufu,Samaneh - Najarpourian,2022-10-07 **An Examination of the Stability of Positive Psychological Capital Using Frequency-based Measurement** Elizabeth Anne McGee,2011 The purpose of this study was to explore the utility of frequency based measurement as an alternative method for examining the stability of psychological capital a higher order construct introduced by Luthans and colleagues 2007 consisting of self efficacy hope resilience and optimism Frequency based measurement is a new approach based on the distributional assessment model Kane 1986 2000 that provides information on the relative frequency of occurrence for specific behaviors over a given period of time and offers a distribution that depicts the scope of an individual s behavior One advantage of this approach is that it can provide information on a person s behavior over time in a single administration allowing researchers to examine the temporal stability of constructs without having to conduct longitudinal studies e g personality Edwards Woehr 2007 To investigate the usefulness of this new approach a series of studies was conducted using a sample of students from a large southeastern university The first study compared a frequency based measure of psychological capital to the more traditional Likert type measure Results indicated that the two are equivalent measures of the central tendency of psychological capital The frequency based measure was also compared to the Likert type measure given across three contexts family school and social settings in a second study Results indicated that the two approaches offered similar information in terms of consistency with both approaches demonstrating some variability in responses over time or across contexts Thus this study provided further evidence that frequency based measurement offers additional information not available in a single administration using a Likert type measure The last study investigated agreement between an individual s self reported psychological capital and ratings of their psychological capital given by an acquaintance Contrary to my expectations within item consistency did not moderate self other agreement The implications of these findings are outlined in addition to suggestions for future research **Measuring Psychological Capital** Michelle

Marie Garven, 2018 According to Luthans Youssef and Avolio 2007 Psychological Capital PsyCap is defined as an individual's positive psychological state of development and is characterized by self-efficacy, optimism, hope, and resiliency. The purpose of this research study was to examine the relationship between Psychological Capital and positive learning outcomes for students. The study investigated six student-centered problem-solving teams (SST) at two schools within a district to probe this relationship. The study also questioned whether the Psychological Capital model that is currently used in business is transferable to education. The research approach used to facilitate this study was a mixed methods approach utilizing a convergent parallel design for data analysis. The study employed the data collection methods of survey, specifically a PsyCap Questionnaire Survey (PCQ), observations of the student-centered problem-solving teams, and a district focus group. Positive learning outcomes for students were measured using the Conditional Growth Index (CGI) on the Measure of Academic Progress (MAP) assessment. Overall, the findings indicated that educators sitting on the student-centered problem-solving teams scored in the high range of Psychological Capital, with the mean score of 115.90 at Melody and 116.00 at Goodview out of 128.00. The mean score for each individual construct within Psychological Capital was also within the high range at each building. In terms of the relationship between Psychological Capital and positive learning outcomes for students, the relationship could not be correlated through statistical analysis. The analysis of the qualitative data from the district focus group supported the high levels of Psychological Capital measured by the PCQ survey tool, whereas qualitative data from the observations of the student-centered problem-solving teams were inconclusive. Through the study, there were implications that more research is needed to correlate a relationship between high Psychological Capital and positive learning outcomes for students. Given the current state of education, school leaders will need to continue to carefully examine factors that contribute to positive learning outcomes for students.

Although there are as many answers to the question of how organizations can gain competitive advantage in today's global economy as there are books and experts, one lesson seems very clear: traditional answers and resources are no longer sufficient. This seminal book offers not only an answer regarding how to gain competitive advantage through people but also a brand new untapped human resource: psychological capital, or simply PsyCap. Generated from both the positive psychology movement and the authors' pioneering work on positive organizational behavior, PsyCap goes beyond traditionally recognized human and social capital. But PsyCap is not a vague or unscientific concept to be included in PsyCap; a given positive construct must be based on theory, research, and valid measurement must be open to development and must have measurable performance impact. The positive constructs that have been determined

to best meet these PsyCap criteria efficacy confidence hope optimism and resiliency are covered in separate chapters in Psychological Capital After exploring other potential positive constructs such as creativity wisdom well being flow humor gratitude forgiveness emotional intelligence spirituality authenticity and courage the authors summarize the research demonstrating the performance impact of PsyCap They go on to provide the PsyCap Questionnaire PCQ as a measurement tool and the PsyCap Intervention PCI as a development aid Utility analysis indicates that investing in the development of PsyCap as presented in this book can result in a very substantial return In total Psychological Capital provides theory research measurements and methods of application for the new resource of psychological capital a resource that can be developed and sustained for competitive advantage **The High Impact Leader** Bruce J.
