Reflecting the broad and interdisciplinary nature of toxicology, this third edition of *Principles of Toxicology* explores the biochemical, physiological, and environmental aspects of the subject. This new edition is updated and revised to include reference to several major new directions in the science of toxicology, including significant changes in *Theistic Evolution*. J. P. Moreland, Stephen C. Meyer, Christopher Shaw, Ann K. Gauger, Wayne Grudem, 2020-06-20. Winner of the ECPA Book of the Year Award for Bible Reference Works. Many prominent Christians insist that the church must yield to contemporary evolutionary theory and therefore modify traditional biblical ideas about the creation of life. They argue that God used, albeit in an undetectable way, evolutionary mechanisms to produce all forms of life. Featuring two dozen highly credentialed scientists, philosophers, and theologians from Europe and North America, this volume contests this proposal, documenting evidential, logical, and theological problems with theistic evolution, making it the most comprehensive critique of theistic evolution yet produced. Explains why theistic evolution is not congruent with a biblical worldview. Features nineteen essays written by well-known experts in their fields. Designed to be used as a textbook for courses on religion and evolution. Accessible for those without expertise in the subject. Physical Chemistry for the
