From Bioeconomics to Degrowth Nicolae Georgescu-Roegen, 2011-03-28 Nicolae Georgescu Roegen 1906 1994 is considered today as perhaps the chief founder of the transdisciplinary field today known as Ecological Economics but that he defined himself as Bioeconomics In his later years Georgescu Roegen intended to write a book of this title that would systematize what he considered to be the most significant results of his work This project intends to resume this project publishing a collection of the most relevant Georgescu Roegen essays on Bioeconomics including previously unpublished papers

Exploring the Ecologies of Music and Sound Makis Solomos, 2023-04-07 Makis Solomos explores the ecologies of music and sound inspired by Felix Guattari for whom environmental destruction caused by capitalism goes hand in hand with deteriorating ways of living and feeling and for whom an ecosophical stance combining various ecological registers offers a glimpse of emancipation a position strengthened today by intersectional approaches Solomos explores environmental mental and social ecologies through the lens of the history of music and current activism especially in the fields of acoustic ecology contemporary music and sound art Several theoretical and analytical debates are put forward including a theory of sound milieu and the biopolitics of sound the relationships between music and the living world soundscape compositions field recording ecomusicology and the creation of sound biotopes the use of sound and music to violent ends as well as considering the social and political functions of music and the autonomy of art sonic ecofeminism degrowth in music and much more

From Bioeconomics to Degrowth Mauro Bonaiuti, 2011 Nicolae Georgescu Roegen 1906 1994 is considered today as perhaps the chief founder of the transdisciplinary field today known as Ecological Economics but that he defined himself as Bioeconomics In his later years Georgescu Roegen intended to write a book of this title that would systematize what he considered to be the most significant results of his work This project intends to resume this project publishing a collection of the most relevant Georgescu Roegen essays on Bioeconomics including previously unpublished papers

The Great Transition Mauro Bonaiuti, 2014 Recent events including the financial crisis and the gradual lessening of the planet's natural resources have raised the fundamental question as to whether the capitalist market system can survive its own contradictions or whether we are witnessing the outset of a profound change in civilization By deploying the tools of the science of complexity alongside those of historical research Mauro Bonaiuti tackles this basic question posed against a backdrop of declining marginal returns where growth in the complexity of industrial military and bureaucratic institutional apparatuses is thought to have led to progressive increases in economic social and environmental costs In this framework the economic crisis we are traversing is grave as it could be interpreted not as a simple cyclical crisis from which it is possible to escape by the traditional policies of supporting growth but as the outcome of a passage of civilization inscribed in the long term evolutionary dynamics of capitalism After the crisis that started in 2008 with millions of

people unemployed with the failure of the economy to pick up and with the ever growing sense of precariousness and insecurity we are beginning to suspect that we are facing something more than a cyclical crisis

The Origins of Ecological Economics Kozo Mayumi, 2001-07-26 Nicholas Georgescu Roegen deserves to be called the father of ecological economics This book connects Georgescu Roegen s earlier work such as consumer choice theory and a critique of Leontief s dynamic model with his later ambitious attempt to reformulate the economic process as bioeconomics a theoretical alternative to neoclassical economics

Bioeconomics and Sustainability Nicholas Georgescu-Roegen, Kozo Mayumi, John M. Gowdy, 1999-01-01 Economists from around the world discuss Georgescu Roegen s 1906-94 theories in a number of areas but especially on environmental and energy economics They address such topics as how long neoclassical economists can continue to ignore his contribu

Bioeconomics and Sustainability Nicholas Georgescu-Roegen, 1999 These essays are in honour of Nicholas Georgescu Roegen the economist s economist His theories are discussed with particular emphasis on environmental and energy economics

A History of Ecological Economic Thought Marco P. Vianna Franco, Antoine Missemer, 2022-08-01 Contributing to a better understanding of contemporary issues of environmental sustainability from a historical perspective this book provides a cohesive and cogent account of the history of ecological economic thought The work unearths a diverse set of ideas within a Western and Slavic context from the Renaissance and the Enlightenment to the late 1940s to reveal insights firmly grounded in historiographical research and of import for addressing current sustainability challenges not least by means of improving our grasp on how humans and nature can generously coexist in the long term The history of ecological economic thought offered in this volume is rich and diverse encompassing views that are bound by the observance of the tenets of the natural sciences but which differ significantly in terms of the role of energy and materials to cultural development and the normative aspects involving resource distribution social ideals and policy making Combining the approaches of independent scholarly figures and scientific communities from different historical periods and nationalities the book brings elements that are still missing in the scarce literature on the history of ecological economic thought and highlights the underlying threads which unite such initiatives The book brings a fresh look into the historical development of ecological economic ideas and will therefore be of great interest to scholars and students of ecological economics environmental economics sustainability science interdisciplinary studies and history of economic thought

Ecological Economics and Sustainable Development Herman E. Daly, 2007 This clear thinking collection brings together 25 of Daly s essays speeches reviews and testimonials from the past decade as a whole they provide a useful masterclass on the principles of ecological economics Daly s vision as well as his frustration with mainstream economists refusal to engage with his arguments comes through loud and clear New Scientist It s hard to imagine ecological economics without the numerous and profound contributions of Herman Daly These papers reveal the consistency of his analysis and clarity of exposition that have made him one of the most influential economists of his generation Because of Herman Daly we have a much better

understanding of how economies relate to the environment why so much is wrong with this relationship and what must be done to fix it Peter Victor York University Canada This thrilling compilation outlines the origins of the young discipline of ecological economics by the intellectual leader of the movement Herman Daly He recounts how as a member of the recently demoted environment department at the World Bank he integrated ecology with economics during his six years in the bowels of the beast Herman lucidly and compellingly combines common sense with profound understanding of both economics and ecology to arrive at sustainable solutions to the global problematique Herman s rigorous yet compassionate solutions to climate change peak oil globalization vs internationalization poverty reduction and the unsung concept of scale leading to uneconomic growth are precisely what we need to prevent the current liquidation of our beautiful world This book will galvanize you into the action we need so much Robert Goodland Environmental adviser World Bank Group 1978 2001 In this book written in crystal clear style Herman Daly reiterates the main points of his analysis and vision he praises some teachers John Ruskin Frederick Soddy Nicholas Georgescu Roegen Kenneth Boulding he fearlessly attacks some adversaries in the World Bank and MIT and he offers some advice to the government of his own country to the Russian Duma and especially to OPEC that if followed would change the world very much for the better Finally on a different line of thought he interrogates conservation biologists on their reasons for wanting to keep biodiversity since as biologists they claim that evolution has no particular purpose Why not let the Sixth Great Extinction run its course In other words science cannot provide an ethics of conservation which Herman Daly finds in religion more than in democratization deliberations Joan Martinez Alier Universitat Auton ma de Barcelona Spain Ecological Economics and Sustainable Development comprises a carefully chosen selection of some 25 articles speeches congressional testimonies reviews and critiques from the last ten years of Herman Daly s ever illuminating work This book seeks to identify the blind spots and errors in standard growth economics alongside the corrections that ecological economics offers to better guide us toward a sustainable economy one with deeper biophysical and ethical roots Under the general heading of sustainability and ecological economics many specific topics are here brought into relation with each other These include limits to growth full world versus empty world economics uneconomic growth definitions of sustainability peak oil steady state economics allocation versus distribution versus scale issues non enclosure of rival goods and enclosure of non rival goods production functions and the laws of thermodynamics OPEC and Kyoto involuntary resettlement and development resource versus value added taxation globalization versus internationalization immigration climate change and the philosophical presuppositions of policy including the policies suggested in connection with the topics above This fascinating work will appeal to scholars and academics of ecol *The Origins of Ecological Economics* , **Realizing an Alternative Political Economy of Sustainability** Arturo Hermann, 2025-07-25 Engagement with and between a plurality of progressive non neoclassical traditions is an important step in fostering a more capacious understanding of sustainability both as a concept and as a political objective To that end this book provides a critical

overview of the development of alternative perspectives on the economics of sustainability highlighting the presence of various strands of heterodox economics and radical ecology and arguing that greater engagement between these schools of thought is required to help formulate viable alternatives to the prevailing neoliberal ideology The chapters in Part I of this volume Ecofeminism Social Ecological Economics Bioeconomics Steady State present a series of concrete policy proposals for building socially just sustainable socio economic processes Each chapter utilizes the acumen of a given heterodox tradition to formulate policy reforms to secure this objective In Part II Heterodox Macroeconomics and Sustainability the contributors make the case for more radical forms of socio economic transformation particularly emphasizing community local and regional level initiatives for change The final part Circular Economy Civil Economy and Other Heterodox Contributions reflects on the potential strategic political economic contribution of heterodox economics to building more sustainable and just socio economic practices in a broader sense These chapters demonstrate that heterodox economics and radical ecology can productively contribute to realizing sustainability in areas such as economic pedagogy through working in conjunction with other social justice movements and by challenging extant neoliberal ideologies of sustainability They also deliberate on some of the institutional and epistemological challenges that confront heterodox practitioners seeking to make such an impact This volume is essential reading for anyone concerned with a viable alternative conception of the economy and sustainability including readers from all schools of heterodox economics and radical ecology and people and organizations involved in various ways in building an alternative political economy of sustainability

Beyond Reductionism Katharine Farrell, Tommaso Luzzati, Sybille van den Hove, 2013-05-07 This is a book about the work of scientists in the era of the Anthropocene where human beings appear to have become a driving force in the evolution of the planet It is a diverse collection of empirical methodological and theoretical chapters concerned with the practice of interdisciplinary social ecological systems research The aim of the contributors is to give the reader an appreciation for the range and complexity of the challenges faced by researchers research institutions and wider communities trying to make sense of the causes and consequences of the this new era of global environmental change The tragedy of the Anthropocene of the large scale anthropogenic habitat destruction and planet wide impacts of anthropogenic climate change is not that science has failed humanity but rather that it has served humanity all too well making possible in just a few hundred years volumes and scales of human activity far exceeding anything ever seen before Coming to terms with that success was the aim of the 1969 Alpbach Symposium from which this book draws its name where contributors including Friedrich Hayek and Ludwig von Bertalanffy asked themselves what theory practices and standards are required to move beyond reductionism Like those from 1969 the answers presented in this collection are hugely diverse ranging from PhD students concerned with research methods and institutional obstacles to mid career scholars presenting their innovative beyond reductionism research methods to emeritus professors looking back over what has been achieved in the past 30 years and suggesting

where things might go from here All the contributors begin from the premise that the challenges of the Anthropocene can only be successfully met if interdisciplinary research effectively brings together social and natural sciences the humanities stakeholders and decision makers They conclude in unison that both the institutional and the methodological foundations needed to do this work are still sorely lacking While this may seem a dismal position the book is full of success stories such as the integrative approach of MuSIASEM Multi Scale Integrative Assessment of Social Ecological Metabolism developed by Mario Giampietro's group in Barcelona Spain the alternative perspectives of what Ariel Salleh calls the meta industrial discourse in Ecofeminism or the innovative trans departmental status of the Stockholm Resilience Centre in Sweden Putting both the theoretical and methodological challenges of moving beyond reductionism on the table for discussion this text aims to help a growing community of passionate thinkers and actors better understand themselves and their work

On Georgescu-Roegen's Contribution to Ecological Economics Philip A. Lawn, 1999 *Nicholas Georgescu-Roegen, pour une révolution bioéconomique* Antoine Missemer, 2015-02-02

Sobriété promotion de l'agriculture biologique chasse au gaspillage Ces principes bio économiques noncés par Nicholas Georgescu Roegen dans les années 1970 ont été l'origine de l'association communément faite entre ses travaux et le mouvement de la décroissance Cette affiliation s'avère pourtant réductrice La participation de Georgescu Roegen aux premiers débats écologiques et son appel à une réforme profonde de la théorie économique en font un acteur majeur des débats intellectuels de la seconde moitié du xxe siècle bien au-delà des controverses de l'écologie radicale La pensée de Georgescu Roegen travers ses inspirations sa clairvoyance ses subtilités mais aussi ses ambiguïtés et contradictions offre un cadre de réflexion privilégié pour enraciner la réflexion économique dans la dynamique écologique Cet ouvrage contient par ailleurs la rédaction d'un texte moins connu de Georgescu Roegen publié en 1978 De la science économique la bio économie est riche en enseignements dans le contexte des préoccupations environnementales actuelles
