Joaquin Garcia-Alfaro, Jordi Herrera-Joancomartí, Giovanni Livraga, Ruben Rios, 2018-09-06 This book constitutes the refereed conference proceedings of the 2nd International Workshop on Cryptocurrencies and Blockchain Technology CBT 2018 and the 13th International Workshop on Data Privacy Management DPM 2018 on conjunction with the 23rd European Symposium on Research in Computer Security ESORICS 2018 held in Barcelona Spain in September 2018 From the CBT Workshop 7 full and 8 short papers out of 39 submissions are included The selected papers cover aspects of identity management smart contracts soft and hardforks proof of works and proof of stake as well as on network layer aspects and the application of blockchain technology for secure connect event ticketing The DPM Workshop received 36 submissions from which 11 full and 5 short papers were selected for presentation The papers focus on challenging problems such as translation of high level business goals into system level privacy policies administration of sensitive identifiers data integration and privacy engineering Handbook Of Digital Enterprise Systems: Digital Twins, Simulation And Ai Wolfgang Kuhn, 2019-06-04 Digitalization is changing nearly everything This compendium highlights a comprehensive understanding of the concepts and technologies about digitalization in industrial environments using the Industrial Internet of Things Digital Twins and data driven decision making approaches including Artificial Intelligence The overview of industrial enterprise platforms and the consideration of future trends gives a fundamental idea of concepts and strategies how to get started and about the required changes of business models Value Creation with Digital Twins Linard Dario Barth, 2024-09-20 A digital twin is a digital representation of a real world counterpart which can receive and provide data to create value within a use case Digital twins create value for users by enabling new and enhanced smart services However ambiguous definitions and terminology coupled with a lack of shared conceptual reference frameworks complicate cross functional discussions and hinder the widespread implementation of digital twins This thesis proposes a new definition and presents two conceptual reference frameworks to systematically depict value creation with digital twins A design science research approach with mixed methods was used to iteratively design and evaluate these artifacts while ensuring scientific rigor practical relevance and usefulness The applied methods within the five research phases include systematic literature research interviews workshops with academic experts qualitative and quantitative questionnaires workshops with practice experts and an in depth case study in smart waste management The major findings of this research are i the proposal of a new definition of digital twins that reflects a practical understanding by focusing on value creation ii a scientific conceptual reference framework focusing on completeness by distinguishing 81 elements involved in value creation with digital twins iii a second more application oriented conceptual reference framework focusing on the interrelations of the elements essential for the value creation in practice and iv an instantiation of the application oriented framework for the use case of the in depth case study All artifacts are consistent in content and include the following main dimensions which are to be considered when creating value with digital twins data resources internal value creation and external value creation These artifacts contribute to a common

understanding of value creation with digital twins in research and practice Furthermore they enable researchers and practitioners to structure their digital twin activities and communicate them to internal and external stakeholders

Measuring the Business Value of Cloud Computing Theo Lynn,John G. Mooney,Pierangelo Rosati,Grace Fox,2020-08-27

The importance of demonstrating the value achieved from IT investments is long established in the Computer Science CS and Information Systems IS literature However emerging technologies such as the ever changing complex area of cloud computing present new challenges and opportunities for demonstrating how IT investments lead to business value Recent reviews of extant literature highlights the need for multi disciplinary research This research should explore and further develops the conceptualization of value in cloud computing research In addition there is a need for research which investigates how IT value manifests itself across the chain of service provision and in inter organizational scenarios This open access book will review the state of the art from an IS Computer Science and Accounting perspective will introduce and discuss the main techniques for measuring business value for cloud computing in a variety of scenarios and illustrate these with mini case studies

Promoting the digitalization of small and medium-sized agrifood enterprises in Asia and the Pacific Gálvez Nogales, E., Casari, G., 2023-12-11 Small and medium sized enterprises SMEs constitute the large majority of businesses both globally and in Asia and the Pacific Despite their undeniable importance the literature on SMEs in general and agrifood SMEs in particular is relatively limited One specific area that deserves deeper consideration is the extent of digital engagement of agrifood SMEs along the agrifood value chain from farm to retail and food services in countries in Asia and the Pacific The goal of this publication is to understand the current status of digitalization of agri SMEs in Asia and the Pacific what this process looks like and how to improve it A value chain approach was adopted to evaluate the digital maturity of all types of agri SMEs across previously siloed categories from farm to fork and in the core and the extended value chain The report analyses the benefits of digital transformation for agri SMEs and the challenges they face in this process Next the report outlines practical and actionable measures that governments and other stakeholders may undertake to help agrifood SMEs stay ahead in the digital age Special attention is given to the creation of a digital environment that enables agri SMEs to increase the efficiency of their operations and allow them to grow This is particularly important given

that many agri SMEs are located in rural agricultural areas where more than half of the population in Asia and the Pacific still resides but where the environment is less favourable to digital transformation *Digital Technology: The World Of Our Own* Binayaka Mishra,2022-05-12 Digital Transformation often referred as DX or DT IT modernisation for example cloud computing to digital optimization to the creation of new digital business models are all examples of digital transformation In general it refers to the use of digital technology to significantly enhance or create new business processes So what exactly is digital transformation for businesses It is the process of understanding consumer needs and using technology to enhance the end user experience End users may be either customers or workers and many businesses must consider both In the marketing department for example digital transformation may generate more high quality leads and help firms get closer to their customers while spending less money than traditional analogue marketing tactics Aside from experimenting with new technology digital transformation entails rethinking your current approach to common challenges A transition does not always have a clear finish since it is an evolution When it comes to the topic what is digital transformation the MIT Sloan Management Review a journal that focuses on management transformations noted Digital transformation is best viewed of as continuing adaptation to a constantly changing environment This implies that businesses must always seek methods to enhance the end user experience This might be accomplished via increasing on demand training migrating data to cloud services using artificial intelligence and other methods *Managing Distributed Cloud Applications and Infrastructure* Theo Lynn,John G. Mooney,Jörg Domaschka,Keith A. Ellis,2020-07-20 The emergence of the Internet of Things IoT combined with greater heterogeneity not only online in cloud computing architectures but across the cloud to edge continuum is introducing new challenges for managing applications and infrastructure across this continuum The scale and complexity is simply so complex that it is no longer realistic for IT teams to manually foresee the potential issues and manage the dynamism and dependencies across an increasing inter dependent chain of service provision This Open Access Pivot explores these challenges and offers a solution for the intelligent and reliable management of physical infrastructure and the optimal placement of applications for the provision of services on distributed clouds This book provides a conceptual reference model for reliable capacity provisioning for distributed clouds and discusses how data analytics and machine learning application and infrastructure optimization and simulation can deliver quality of service requirements cost efficiently in this complex feature space These are illustrated through a series of case studies in cloud computing telecommunications big data analytics and smart cities **Australasian Conference on Information Systems 2018** Australasian Conference on Information Systems,2018-01-01 Databases Software development Computer programming Business applications Computer networking and communications Operating systems Telecommunications Communications engineering **Beyond Edge Computing** Ana Juan Ferrer,2023-03-22 This book explores the most recent Edge and Distributed Cloud computing research and industrial advances settling the basis for Advanced Swarm Computing developments It features the Swarm computing

concepts and realizes it as an Ad hoc Edge Cloud architecture Unlike current techniques in Edge and Cloud computing that solely view IoT connected devices as sources of data Swarm computing aims at using the compute capabilities of IoT connected devices in coordination with current Edge and Cloud computing innovations In addition to being more widely available IoT connected devices are also quickly becoming more sophisticated in terms of their ability to carry considerable compute and storage resources Swarm computing and Ad hoc Edge Cloud take full advantage of this trend to create on demand autonomic and decentralized self managed computing infrastructures Focusing on cognitive resource and service management the book examines the specific research challenges of the Swarm computing approach related to the characteristics of IoT connected devices that form the infrastructure It also offers academics and practitioners insights for future research in the fields of Edge and Swarm computing

Digital Twin Driven Smart Manufacturing Fei Tao, Meng Zhang, A.Y.C. Nee, 2019-02-07 Digital Twin Driven Smart Manufacturing examines the background latest research and application models for digital twin technology and shows how it can be central to a smart manufacturing process The interest in digital twin in manufacturing is driven by a need for excellent product reliability and an overall trend towards intelligent and connected manufacturing systems This book provides an ideal entry point to this subject for readers in industry and academia as it answers the questions a What is a digital twin b How to construct a digital twin c How to use a digital twin to improve manufacturing efficiency d What are the essential activities in the implementation of a digital twin e What are the most important obstacles to overcome for the successful deployment of a digital twin f What are the relations between digital twin and New Technologies g How to combine digital twin with the New Technologies to achieve high efficiency and smartness in manufacturing This book focuses on these problems as it aims to help readers make the best use of digital twin technology towards smart manufacturing Analyzes the differences synergies and possibilities for integration between digital twin technology and other technologies such as big data service and Internet of Things Discuss new requirements for a traditional three dimension digital twin and proposes a methodology for a five dimension version Investigates new models for optimized manufacturing prognostics and health management and cyber physical fusion based on the digital twin
