Durand,2006-04-25 I have no doubt this book will be read and used time and again by any scholar working within the
evolutionary approach to organizations I believe that it will also be of great interest to strategy scholars Management
Rodolphe Durand has a compelling message for the growing community of evolutionary researchers in organization studies

they are to avoid false tracks and simplisitic analogies Durand offers here the foundations of a distinctive and authentic
evolutionary theory that takes organizations seriously for what they are Richard Whittington Oxford University This book fills
an important gap in the study of organizations and strategy from an evolutionary perspective It offers a synthetic approach to
evolutionary analysis with grounded empirical examples that graduate students and seasoned scholars alike will find
immensely useful Durand s OES model rooted in a critical examination of philosophical and scientific writings on evolution is
particularly promising and provides a valuable guidepost for future research on organizations and strategic management
Michael Lounsbury University of Alberta How is economic evolutionary theory in which organisations evolve according to
environmental selection reconciled with evidence of strategic management This book is the first of its kind to propose a
solution to this theoretical puzzle and engage readers in a balanced understanding of organizational evolution Rodolphe
Durand embarks upon a fresh assessment of the literature His discoveries provide the foundation for a new theory of
organizational selection and an organizational evolution and strategy model that reconciles economic evolution with strategic
intentionality Chapters include an examination of the work by Lamarck Darwin and Spencer a constructive appraisal of
evolutionary theory applied to organisations and a summary of how the organizational evolution and strategy model will
