Predictions in the Brain Moshe Bar, 2011-05-10

When one is immersed in the fascinating world of neuroscience findings the brain might start to seem like a collection of modules each specializes in a specific mental feat But just like in other domains of Nature it is possible that much of the brain and mind s operation can be explained with a small set of universal principles Given exciting recent developments it seems that the generation of predictions might be one strong candidate for such a universal principle This is the focus of Predictions in the brain From the predictions required when a rat navigates a maze to food caching in scrub jays from predictions essential in decision making to social interactions from predictions in the retina to the prefrontal cortex and from predictions in early development to foresight in non humans In addition to presenting the state of the art of research and ideas about predictions in mind and brain it is hoped that this collection will stimulate important new research into the foundations of our mental lives
