Expatriate Managers Anna Spiegel, Ursula Mense-Petermann, Bastian Bredenkötter, 2017-10-18 Since the 1990s economic and cultural globalization has propelled the transnational mobility of managers and fueled cross border careers. Some scholars have argued for the emergence of a new global business elite with cosmopolitan mind sets and homogeneous lifestyles while others have highlighted their disconnection from the local surroundings and their everyday life within national expatriate bubbles. Thus the question of whether today's mobile professionals can be described as interculturally open and competent cosmopolitans or as pronounced anti cosmopolitans is still unanswered. *Expatriate Managers and the Paradoxes of Working and Living Abroad* considers a core protagonist of economic globalization and the management of MNCs through the lens of a practice based theoretical approach whilst seeking to address this question by building on intensive ethnographic case studies of expatriate managers, most of them high ranking executives from two comparative different home countries, the US and Germany. These managers together with their families have been assigned to China, Germany or the US to perform demanding coordination tasks within their multinational corporations, MNCs. Based on detailed accounts of expatriate managers' experiences and everyday practices, the book reveals the multiple and sometimes paradoxical ways in which they deal with cultural differences as they build up new forms of working, belonging and dwelling. The findings suggest that the newly emerging mind sets and lifestyles of expatriate managers transcend the polarized images of mobile elites as either cosmopolitan global managers or parochial anti cosmopolitans. *Expatriate Managers and the Paradoxes of Working and Living Abroad* examines the global elite from an everyday perspective showing that understanding the dynamics of a global economy requires probing into the lifeworld's agency and everyday arrangements of the social actors who are putting globalization into practice.

Future Tech Trond Arne Undheim, 2021-03-03 Amazon's Fire phone, Google Glass, Facebook Home, Quikster. New technologies alone don't always cause industry changes. *Future Tech* explains how the four forces of technology, policy, business models and social dynamics work together to create industry disruption and how this understanding can help to predict what is coming next. Technology is generally viewed as the single force that

disrupts markets However history is rife with stories of technologies that have failed to meet such hyped expectations In Future Tech the author reveals that true change only results from combining the forces of science and technology policy and regulation new business models i e sharing economy and social dynamics whether or not people adopt it Whether these four forces align explains why some technologies such as AI blockchain robotics synthetic biology and 3D printing stick and why others fail With an understanding of these four forces business executives and policymakers can explain what technology is likely to stick and even anticipate what is coming next By 2030 the global labor force will be led by an elite set of knowledge workers enabled by robotic AI To help individuals thrive in this workplace Future Tech advises readers to develop their human capabilities of creativity and adaptation develop deep expertise in one domain while being well versed in dozens more and develop a personalized approach to acquiring and processing information and deliberating decisions

Disruptive Innovation in Chinese and Indian Businesses Peter Ping Li, 2013-03-12 With the rapid development of China and India as new economic powers in global competition an obvious question is whether these emerging economies are great opportunities or threats Whilst answers are bound to differ depending on one's perspective it is increasingly clear that more local firms especially local entrepreneurs from these emerging economies will play a more critical role in global competition by becoming challengers to global incumbents Indeed the fact that the majority of their populations are at the bottom of the pyramid and thus cannot afford products designed for the developed markets has made these emerging economies fertile ground for developing and applying disruptive innovations A novel mix of key attributes distinctive from those of established technologies or business models disruptive innovations are typically inferior yet affordable and good enough products or services which originate in lower end market segments but later move up to compete with those provided by incumbent firms This book sheds new light on disruptive innovations both from and for the bottom of the pyramid in China and India from the point of view of local entrepreneurs and international firms seeking to operate their businesses there It covers both the theoretical and practical implications of disruptive innovation using conceptual frameworks alongside detailed case studies whilst also providing a comparison of conditions and strategic options in India and China Further unlike existing studies this book focuses on the neglected perspective of local challengers as the primary players and in doing so reveals the extent to which the future landscape of global competition may be shaped by disruptive innovation as well as its capacity to make the world flatter and more sustainable This unique book will be valuable to both scholars and practitioners interested in disruptive innovation and those working in the fields of Asian studies international business economics and globalization
