The Apocalypse of Enoch and Bhu unda The Apocalypse of Enoch and Bhu unda challenges the underlying assumptions of the classical roots of civilization by restoring the original context of creation mythology. In this second volume of *A Chronology of the Primeval Gods* and the Western Sunrise, ancient myths from multiple geographies are correlated to spikes in cosmic rays over the past 120,000 years as documented in ice core data. The chronology and content of these myths tell us that the primary forces behind these cataclysms were the most ancient gods: hyper nova at the Galactic Center associated with Sgr A, The Dragon, Sgr West, The Beast, and Sgr East; Hiranyaksha and Hiranyakshaipu with secondary supernova seen as the birth of new destructive gods. Ancient myth has documented the cataclysmic destruction of the world on at least twenty occasions with four major geo polar migrations which has resulted in a shift of the earth's equator on at least one occasion. Multiple myths are shown to represent a view of the sky that can only be seen from the Antarctic region. Multiple versions of the myths of Orion are analyzed showing clear linkages between the Vedic myth of Trishanku, the Book of Genesis, Senmut's Tomb, and the myths of Prajapati, Daksa, representing the oldest version of the Orion myth older than Trishanku and Genesis by 20,000 years. The stunning conclusion explains how the Watchers of Enoch were the Vedic descendants of Ila and Ikshvaku. These descendants of the seventh Manu had been observing and recording the stars as a source of cataclysm for at least 15,000 years prior to Enoch, thus allowing Enoch to prophesize a new heaven. That prophecy became the foundation for St. John's Book of Revelations which is shown to be a description of a series of cataclysms attributed to Sgr West. The book offers a new theory for explaining geo polar migration. That theory suggests small shifts in the location of the earth's center of gravity underlie each migration but that there are multiple causes for the shifts.
