

- Redshift – light moves towards red end of the spectrum

Speed of Galaxies

- Speed of galaxies AND amount by which light from a galaxy is red-shifted...
 - ...may be determined by measuring the change in wavelength of light coming from that galaxy

$$\frac{\text{change in wavelength}}{\text{reference wavelength}} = \frac{\text{velocity of a galaxy}}{\text{speed of light}}$$

$$\frac{\lambda - \lambda_0}{\lambda_0} = \frac{\Delta\lambda}{\lambda_0} = \frac{v}{c}$$

- λ_0 = the wavelength of light for a stationary observer (reference wavelength, measured in lab) → when it was emitted BEFORE it was red-shifted
- λ is the measured wavelength
- $\Delta\lambda$ is the change in wavelength
- speed of light = 3.00×10^8 m/s

Speed of Galaxy related to its distance

- Hubble discovered that the speed of a galaxy is proportional to its distance from us

8.17P describe the red-shift in light received from galaxies at different distances away from the Earth

The Red-shift of GALAXIES

- The light coming to us from distant galaxies is redshifted (they are moving AWAY from us)

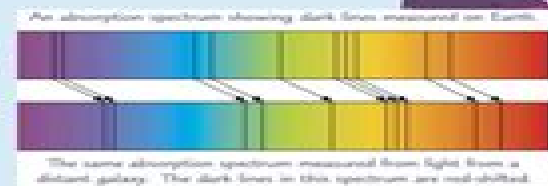

Hubble's LAW

- Furthermore, the greater the distance to the galaxy, the greater the redshift
 - The more distant galaxies are moving away from us faster

Light from Galaxies is RED-SHIFTED

Most galaxies seem to be moving away from each other, because:

- Different elements absorb different frequencies (OR wavelengths) of light
- When light is passed through a sample of an element, a pattern of dark lines is produced – with a dark line at each of the frequencies in the visible part of the EM spectrum that the element absorbs
- When we look at light from distant galaxies, we see the SAME patterns BUT at slightly lower frequencies (and so lower wavelengths) than they should be
- Patterns have been shifted towards the red end of the spectrum – red-shift

8.18P explain why the red-shift of galaxies provides evidence for the expansion of the universe

- Measurements of the red-shift suggest that All the distant galaxies are MOVING AWAY from Earth very quickly – same result in whichever direction you look in

consolidate their knowledge best if they have access to a wide variety of worked examples to study from Physics by Example is based upon this concept with each topic having a short introduction followed by around ten example questions Each question has a full e step by stepe easy to follow solution including hints and and tips to help the student understand the methodology for each question At the end of each section there is a self testing exercise with answers to help the students consolidate their knowledge Prichard Guides work best if they are used in conjunction with the student s own notes to support their own learning These guides provide a huge resource of model questions and answers which have been tried and tested in classrooms across the UK and abroad as they have been the basis of the author s lessons for nearly three decades have been very successful and are still being used in lessons today Physics for Advanced Level Jim Breithaupt,2000 This course study guide is to be used with New Understanding Physics for Advanced Level or other physics core textbooks It aims to help further develop physics skills such as laboratory techniques mathematical methods and data handling The course study guide also provides outline solutions to a selection of questions and gives advice on answering all types of examination questions and support for Key Skills **Physics** Jim Breithaupt,1994 This teacher s guide accompanies a textbook written for the co ordinated science syllabuses under the National Curriculum and for Science Physics There are companion volumes on biology and chemistry Topics are differentiated into core material for Double Single Science and extension material for Science Physics These topics are linked to related ones in the companion volumes but the links are optional allowing the physics book to stand alone The teacher s guide includes a link to the Programme of Study for Sc4 and part of Sc3 and an analysis of the separate science syllabuses of all the main boards

Decoding **Gcse Physics Notes**: Revealing the Captivating Potential of Verbal Expression

In a time characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its power to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Gcse Physics Notes**," a mesmerizing literary creation penned by way of a celebrated wordsmith, readers embark on an enlightening odyssey, unraveling the intricate significance of language and its enduring effect on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
