

APPLE MACS/MACBOOK'S

As I took Media at GCSE, I have increasingly grown more familiar with apple technology over time. As I am familiar with these already, I didn't really learn anything new during this course. I wasn't faced with any major problems during the period of the course, everything went to plan and ran smoothly, this meant that I was able to efficiently create my film poster, film magazine and film trailer with ease. The Macbook's were used to take home as they have the software required pre-installed on them, software such as Photoshop and Final cut express meant that I was able to work from home, giving me an opportunity to work on my products when I wasn't in school.

Gcse New Macs:

How Good an Historian Shall I Be? Marnie Hughes-Warrington, 2012-02-28 R G Collingwood's name is familiar to historians and history educators around the world. Few however have charted the depths of his reflections on what it means to be educated in history. In this book Marnie Hughes-Warrington begins with the facet of Collingwood's work best known to teachers: re-enactment and locates it in historically informed discussions on empathy, imagination and history education. Revealed are dynamic concepts of the a priori imagination and education that tend towards reflection on the presuppositions that shape our own and others forms of life. Empathy and History Tyson Retz, 2018-07-27 Empathy and History offers a comprehensive and dual account of empathy's intellectual and educational history. Beginning in an influential educational movement that implanted the concept in R G Collingwood's re-enactment doctrine, the book goes back to reveal the fundamental role that empathy played in the foundation of the history discipline, before tracing its reception and development in twentieth century hermeneutics and philosophy of history. Attentive to matters of practice, it illuminates the distinct character of the historical context that empathetic understanding seeks to capture and sets out a new approach to empathy as a special variety of historical questioning. **Secondary Education Journal**, 1986 The Changing Face of Educational Assessment Roger Murphy, Harry Torrance, 1988 *Which Way Social Justice in Mathematics Education?* Leone Burton, 2003-02-28 This contributed volume explores equity and social justice within the field of mathematics education. In part one Helga Jungwirth's introductory chapter provides a strong theoretical overview that is based in actual classroom behaviors and a typology that classifies the various interpretations found within this volume. Also in part one Laurie Hart discusses developments in equity research in the United States. Part two focuses on results of studies about social justice and their impact on learning in mathematics classrooms in various parts of the world. For example, in a chapter on Peru, social justice does not just encompass gender but also inequalities in opportunities to learn, such as problems of resources, living and social conditions, communal demands and language needs. And part three focuses on computers as a resource to mathematics teaching. The contributors raise several important social justice issues which have previously remained unresearched. Although there are a number of chapters specifically dealing with gender, many of the authors use one of the following strategies: their gender-specific questions are set in a wider socio-cultural context; they challenge what have threatened to become false orthodoxies; or they raise other important issues. These other issues include the meaning of democratic citizenship for mathematics classrooms; the links between parents and children learning mathematics; and the preconceptions of some teachers of underprivileged students in Australia. Other chapters explore different forms of classroom communication, participation and assessment. The pieces on computers state that there is still not enough research to conclude whether computers in the mathematics classrooms are supportive of or detrimental to the learning of all students. The one thing on which every author in this volume does agree is that social justice in mathematics education has still not

been attained but that we must strive toward it to improve educational practices and society in general *Francophonie* ,1997 *Cumulative Book Index* ,1998 A world list of books in the English language **Fortnight** ,1987 The Multimedia and CD-ROM Directory ,1998 **NewMedia** ,1999 *The British National Bibliography* Arthur James Wells,2009 **The Historian** ,1987 **Journal of Biological Education** ,1991 *British Education Index* ,1997
