Computer-Aided Design of User Interfaces IV Robert J.K. Jacob, Quentin Limbourg, Jean Vanderdonckt, 2006-03-07 Computer Aided Design of User Interfaces IV gathers the latest research of experts research teams and leading organisations involved in computer aided design of user interactive applications supported by software with specific attention for platform independent user interfaces and context sensitive or aware applications This includes innovative model based and agent based approaches code generators model editors task animators translators checkers advice giving systems and systems for graphical and multimodal user interfaces It also addresses User Interface Description Languages This books attempts to emphasize the software tool support for designing user interfaces and their underlying languages and methods beyond traditional development environments offered by the market It will be of interest to software development practitioners and researchers whose work involves human computer interaction design of user interfaces frameworks for computer aided design formal and semi formal methods web services and multimedia systems interactive applications and graphical user and multi user interfaces

Machine Design Robert L. Norton, 2006 Machine Design presents the subject matter in an up to date and thorough manner with a strong design emphasis This textbook emphasizes both failure theory and analysis as well as emphasizing the synthesis and design aspects of machine elements The book points out the commonality of the analytical approaches needed to design a wide variety of elements and emphasizes the use of computer aided engineering as an approach to the design and analysis of these classes of problems About 100 new problems will be added throughout the book and certain topics are updated and enhanced

Modes of Uncertainty Limor Samimian-Darash, Paul Rabinow, 2015-07-15 Modes of Uncertainty offers groundbreaking ways of thinking about danger risk and uncertainty from an analytical and anthropological perspective Our world the contributors show is increasingly populated by forms practices and events whose uncertainty cannot be reduced to risk and thus it is vital to distinguish between the two Drawing the lines between them they argue that the study of uncertainty should not focus solely on the appearance of new risks and dangers which no doubt abound but also on how uncertainty itself should be defined and what the implications might be for policy and government Organizing contributions from various anthropological subfields including economics business security humanitarianism

health and environment Limor Samimian Darash and Paul Rabinow offer new tools with which to consider uncertainty its management and the differing modes of subjectivity appropriate to it Taking up policies and experiences as objects of research and analysis the essays here seek a rigorous inquiry into a sound conceptualization of uncertainty in order to better confront contemporary problems Ultimately they open the way for a participatory anthropology that asks crucial questions about our contemporary state
